Re: Upcoming Construction Work in Ayr

2016-161 Ayr Sewage Pumping Station and Channel Works

2016-162 Ayr Sanitary Forcemain and Swan Street Watermain

The Region of Waterloo (ROW), Design and Construction Division will be constructing a new sewage pumping station with an accompanying sanitary forcemain, as well as a new watermain in southern Ayr (see attached site map). Both construction contracts are expected to start on or about September 6, 2016. Completion of the sanitary forcemain and watermain work is expected to be completed by the end of 2016, and completion of the pumping station work is scheduled for the end of 2017.

The Region of Waterloo retained the consulting firm, GM BluePlan of Kitchener, to provide administration and inspection during the construction. Bestco Construction of Ancaster was awarded the pump station contract and C.C. Underground of Orillia was awarded the forcemain and watermain contract.

The Region expects the construction impact to local residents to be minor, but local residents may notice traffic disruptions and construction related noise along Swan Street, Brant-Waterloo Road, and Nith Road during the construction period. It is expected that the Contractors will only work between the hours of 7:00 am to 7:00 pm, Monday to Friday (and possibly Saturdays if required).

If you have any questions regarding this proposed construction project please feel free to contact the ROW Project Manager, Jeff Medd at 519-575-4757 ext.3344, jmedd@regionofwaterloo.ca or, Paul Gregorio, Site-Inspector, GM BluePlan, **on site** at (226) 755-3882, Paul.Gregorio@gmblueplan.ca.
