

COVID-19 Vaccine

What you need to know

Get vaccinated. Protect your loved ones.

Addressing vaccine myths

What's NOT in the vaccine?

There are no pork products (gelatin), blood products, fetal cells or formaldehyde. It's preservative free. There is no microchip in the vaccine.

Can it change my DNA?

No. The vaccine does not change your DNA. Vaccines work with your body's natural defences to build protection. They teach your body how to recognize and fight the virus.

Will the province use my information to track me in the future?

Your information is only used to record the second dose and any adverse reaction. The province will not use your information to track you in the future.

How did they develop it so quickly?

The need for the vaccine was urgent. People from around the world worked together. They built on decades of research on viruses like COVID-19 to create the vaccine. Increased funding and fewer delays helped speed the process.

**Vaccines
are safe and
effective.**
