

The more risk factors a person has, the greater the chances of falling.

Five things you can do to prevent falls:

1. Exercise daily to build strength and improve balance.
2. Wear safe footwear.
3. Have regular eye check-ups.
4. Make your home safer.
 - Remove clutter and tripping hazards.
 - Add railings on all stairs and grab bars in the bathroom.
 - Have good lighting, particularly on stairs.
5. Talk to your healthcare provider to learn more about your risk.

Staying Independent

Falls are the main reason older adults lose their independence.

To find out if you are at risk:

1. Answer the statements in this pamphlet.
2. Take this form to your healthcare provider to discuss your risk factors.

Am I at risk of falling?

Instructions: Circle “YES” or “NO” for each statement below. Add up the total number of points for each “YES” answer in the box.

CIRCLE “YES” OR “NO”				HELPFUL TIPS
I have fallen in the past year.	YES 2	NO 0		Learn more about reducing your fall risk, as people who have fallen are more likely to fall again.
I use or have been advised to use a cane or walker to get around safely.	YES 2	NO 0		Talk with a physiotherapist about the most appropriate walking aid for your needs.
Sometimes I feel unsteady when I am walking.	YES 1	NO 0		Exercise to build strength and improve your balance.
I steady myself by holding onto furniture when walking at home.	YES 1	NO 0		Do balance exercises every day. Remove hazards at home that might cause a trip or slip.
I am worried about falling.	YES 1	NO 0		Knowing how to prevent a fall can reduce fear and promote active living.
I need to push with my hands to stand up from a chair.	YES 1	NO 0		Strengthening your muscles can reduce your risk of falling and being injured.
I have some trouble stepping up onto a curb.	YES 1	NO 0		Daily exercise can help improve your strength and balance.
I often have to rush to the toilet.	YES 1	NO 0		Talk with your doctor or healthcare provider about treatment options.
I have lost some feeling in my feet.	YES 1	NO 0		Talk with your doctor or podiatrist, as numbness in the feet can cause stumbles and falls.
I take medication that sometimes makes me feel light-headed or more tired than usual.	YES 1	NO 0		Talk with your doctor or pharmacist about medication side effects that may increase the risk of falls.
I take medication to help me sleep or improve my mood.	YES 1	NO 0		Talk with your doctor or pharmacist about safer ways to get a good night’s sleep.
I often feel sad or depressed.	YES 1	NO 0		Talk with your doctor or healthcare provider about how you are feeling. Ask for help if you need it.
If you scored 4 points or more, you may be at risk for falling. Discuss your risk factors with your healthcare provider.	TOTAL SCORE: _____
