Recommendations for Ministry of the Environment and Climate Change

1. Ministry of the Environment and Climate Change (MOECC) should direct resources towards remedial options for indoor air TCE levels that will achieve the long-term goal of less than 0.5 µg/m³, using the following action levels:

**Action Levels**

- **Less than 0.5 µg/m³**
  - No further remedial actions are required.

- **Between 0.5 µg/m³ and 5 µg/m³**
  - Continue annual indoor air monitoring.
  - Public Health will work with the MOECC to prioritize homes to receive remedial options.

- **Above 5 µg/m³**
  - Continue to be prioritized for indoor air assessments and remediation.
  - Continue annual indoor air monitoring.

2. When choosing between effective options for indoor air mitigation, consideration should be given to minimizing stress and inconvenience for the Bishop Street Community.
