

Fischer-Hallman Road (RR58) Roundabout at New Dundee Road (RR12)
Township of North Dumfries and City of Kitchener

Project Scope

Based on technical studies, current experience with the Region’s existing roundabouts and input received from the public regarding this project, staff have proposed a partial two lane roundabout, with a southbound through-right turn lane and a left turn lane, a westbound through-left turn lane and a right turn lane, and single lanes for the remaining entrances and exits in 2024, for the following reasons:

- The roundabout would result in fewer injury collisions than a signalized intersection;
- The roundabout would result in fewer delays to all users;
- The roundabout would result in lower operating speeds; and
- would provide a gateway feature for traffic entering the south end of Kitchener.

Preliminary Cost Estimate (Budget): \$2,475,000 (From TCP)
