

# Sawmill Road (Reg. Rd. #17) Improvements, River Street to Snyder's Flats Road

## Class Environmental Assessment Study Information Sheet for Schedule A+ Projects

### Study/Project Scope (What & Why)

Due to the age and condition of the pavement on Sawmill Road, it is necessary to reconstruct the existing road. The timing of this reconstruction presents an opportunity to address other deficiencies along this road. These deficiencies include: a lack of cycling lanes and a lack of continuous sidewalks within the project limits; street lighting improvements; the addition of a southbound left-turn lane at Charles Street; and drainage improvements. The Project Team is considering the following improvements to address the pavement condition and the deficiencies in the cycling and pedestrian facilities within this project: Complete road reconstruction with new concrete curb and asphalt roadway surface, widened to meet the current standards; on-road cycling lanes; new sidewalk; construction of a southbound left turn-lane at Charles Street; and drainage and storm sewer improvements/replacement or repair where necessary.

**Preliminary Cost Estimate (Budget):** \$1,255,000.00

### Preliminary Schedule

Commencement of Detailed Design:	November 2015
Commencement of Construction:	August 2018
Completion of Construction:	November 2018

### Project Information

<a href="#">Council Report</a>	November 17, 2015
<a href="#">Notice of Public and Works Committee</a>	November 5, 2015
<a href="#">Public Notice</a>	September 15, 2015
<a href="#">Public Consultation Centre Package</a>	May 8, 2014
<a href="#">Drawing of Cross Section</a>	
<a href="#">Aerial Plan</a>	<a href="#">Full Plan</a>
