

(RR12) New Dundee Road Roundabout at Robert Ferrie Drive

City of Kitchener

Project Scope

Based on technical studies, current experience with the Region's existing roundabouts and input received from the public regarding this project, staff have proposed a double-lane roundabout at New Dundee Road and Robert Ferrie Drive, with expected construction in 2024, for the following reasons:

- The roundabout would result in fewer injury collisions than a signalized intersection; and
- The roundabout would result in fewer delays to all users;
- The roundabout would result in lower operating speeds and would provide a Gateway feature for traffic entering the Doon South community.

Preliminary Cost Estimate (Budget): \$2,903,000 (From TCP)
