# How to read your water bill

- 1 Find the water section of your utility bill**
- 2 View your total consumption**  
Your total consumption is your water use represented in cubic meters (m<sup>3</sup>). 1 m<sup>3</sup> = 1000 litres of water.
- 3 Compare your consumption**  
To compare your household water use to the regional average, take your monthly consumption in cubic meters and divide by the number of people in your home. Compare this number to the chart below.

Number of people in home	Average water use per month	
1 person	4.5 m <sup>3</sup>	4,500 L
2 people	9 m <sup>3</sup>	9,000 L
3 people	13.5 m <sup>3</sup>	13,500 L
4 people	18 m <sup>3</sup>	18,000 L
5 people	22.5 m <sup>3</sup>	22,500 L

Monitor your consumption history for any abnormal jumps which may indicate excessive water use.

Actual readings indicate water used. Estimated readings indicate your use based on your usage history and will be changed to actual once a full reading is complete.

Kitchener residents can save money on stormwater fees by gathering stormwater through rain barrels, rain gardens, infiltration galleries and more. Learn more about stormwater credits at [kitchener.ca/stormwater](http://kitchener.ca/stormwater).
