 Amount Due: \$64.24
 Amount After Due Date \$65.04
 Due Date: Mar 3, 2023
 Amount Paid:

How to read your water bill

1 Find the water section of your water bill

2 View your total consumption

Your total consumption is your water use represented in cubic meters (m³). 1 m³ = 1000 litres of water.

3 Compare your consumption

To compare your household water use to the regional average, take your monthly consumption in cubic meters and divide by the number of people in your home. Compare this number to the chart below.

Number of people in home	Average water use per month	
1 person	4.5 m ³	4,500 L
2 people	9 m ³	9,000 L
3 people	13.5 m ³	13,500 L
4 people	18 m ³	18,000 L
5 people	22.5 m ³	22,500 L

Actual readings indicate water used. Estimated readings indicate your use based on your usage history and will be changed to actual once a full reading is complete.

Monitor your consumption history for any abnormal jumps in water use. A jump or increase in consumption may indicate:

- Change in water use behaviour
- Outdoor watering in the summer
- Old or inefficient appliances
- Leaky faucet or valve
- Leaking toilet flapper
