

## Notice of Virtual Public Consultation Centre #1 Baden and New Hamburg Water and Wastewater System Servicing Review

The Region of Waterloo (Region) has initiated a Servicing Review to assess the current water and wastewater systems that serve the communities of Baden, New Hamburg and Foxboro Green and assess current and future servicing needs.

The Study will review existing conditions and provide recommendations related to the capacity and quality of the supply from the existing water supply system and the capacity and condition of the wastewater treatment and collection system based on current industry standards and new technologies. The recommendations of this review may include the need for upgrades to existing infrastructure or the provision of new infrastructure.

### **How is this Study being undertaken?**

This Study is being undertaken to fulfill the requirements of Phases 1 and 2 of the Municipal Class Environmental Assessment document (October 2000, as amended in 2007, 2011 and 2015), which is an approved process under the Ontario Environmental Assessment Act.

### **How can I participate in this Study?**

A Public Consultation Centre (PCC) is being held online through the Region's YouTube channel to enable you to review the process that will be followed for the project, introduce the project and detail why it's being completed, and provide background information on the Baden and New Hamburg Water and Wastewater Systems. More detailed project information is also available at the links below. We encourage all those who are interested to review the information and contact a member of the project team if you have any questions, comments, or would like to provide input on the study. The PCC materials will be available on the Region's YouTube channel and the Region's website starting Tuesday, June 1, 2021.
