

Notice of Virtual Public Consultation Centre #3

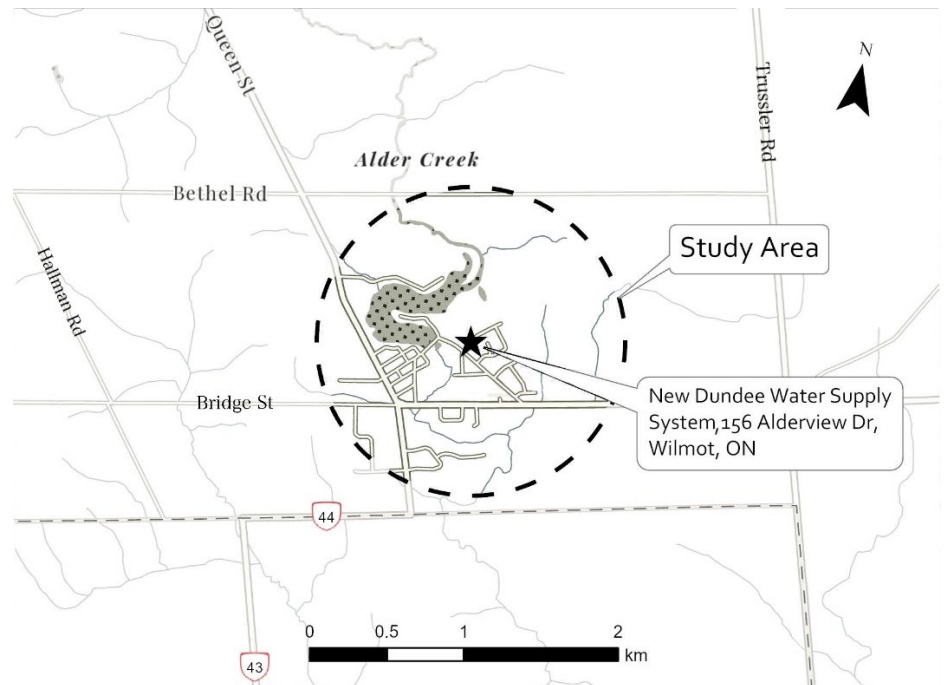

New Dundee Water Supply – Iron and Manganese Water Treatment Upgrades

Municipal Class Environmental Assessment

The Region of Waterloo initiated a Municipal Class Environmental Assessment (EA) Study for iron and manganese treatment upgrades for the New Dundee Water Supply System. The New Dundee Water Supply System is located at 156 Alderview Road in the Town of New Dundee, in the Township of Wilmot. The Study will review and provide recommendations related to iron and manganese treatment upgrades based on current industry standards and new technologies, as well as the location of potential upgrades.

How is this Study being undertaken?

This Study is being undertaken as a Schedule 'C' project in accordance with the requirements of the Municipal Class Environmental Assessment (October 2000, as amended in 2007, 2011 and 2015), which is an approved process under the Ontario Environmental Assessment Act.

How can I participate in this Study?

Three Public Consultation Centres (PCCs) are to be held as part of this study. This third PCC will be a virtual one and will be held to build on the previous two PCCs and obtain comments on the potential facility locations, the evaluation process for selecting a preferred location, and next steps.

On February 8, 2022, we invite you to follow this link:

<https://www.regionofwaterloo.ca/CurrentWaterProjects/> and view a video narration of the presentation on the Region's website or on YouTube. The slides and a transcript are available for download on the Region's website as well, and you may also fill out a Comments Form on the website for submittal to the Project Team. Please submit any comments you may have by March 9, 2022.

If you would like more information on the Study, would like to be removed from the contact list, have any questions about the study, or would like physical copies of the slides, transcript, or Comments Form, please contact either:
