

Notice of Study Commencement

Shingletown Wells Iron and Manganese Treatment Upgrades

Municipal Class Environmental Assessment

The Region of Waterloo has initiated a Municipal Class Environmental Assessment (EA) Study for iron and manganese treatment upgrades for the Shingletown Wells (K50, K51 and K52). The Shingletown Wells are located at 2324 Bleams Road in the Township of Wilmot and are an important part of the Region of Waterloo's water supply. The Study will review and provide recommendations related to iron and manganese treatment upgrades based on current industry standards and new technologies, as well as the location of potential upgrades, should they be recommended.

How is this Study being undertaken?

This study is being undertaken as a Schedule 'C' project in accordance with the requirements of the *Municipal Class Environmental Assessment (October 2000, as amended in 2007, 2011 and 2015)*, which is an approved process under the Ontario Environmental Assessment Act.

How can I participate in this Study?

The Region encourages the public to participate in the study planning process and learn more about the study by:

- Signing up to the email contact list to receive project notices (please email nsapeta@regionofwaterloo.ca to sign up)
- Attending the Public Consultation Centres (PCC) during the study to review information and provide feedback to the project team on the need for improvements/upgrades; potential options; the decision-making process; recommended solutions; and next steps.

If you would like more information on the Study, or would like to sign up for the study contact list, please contact:
