**Reconstruction of Westmount Road, Fischer-Hallman Road to Block Line Road**

The Region of Waterloo is planning construction on Westmount Road from Fischer-Hallman Road to Block Line Road starting in 2026. This project is being planned to address several needs and opportunities including:

- Rehabilitation of the deteriorated pavement.
- Installation of new storm sewers.
- Improved active transportation facilities for pedestrians and cyclists.
- New GRT bus stops.
- Traffic signal upgrades.
- Intersection Improvements.

Based on a technical review by the project team, we are recommending the following upgrades:

- A new landscaped median separating the driving lanes and designated left-turn lanes to abutting driveways and to Tillsley Drive.
- Installation of a new storm sewer system including curb and gutter along the entire project limit extents.
- New sidewalks on each side of the road throughout the project limits.
- New single direction cycle tracks in the boulevard on both sides of the road.
- A short section of new multi-use trail on the east side of Westmount Road that will connect to the existing multi-use trail on Fischer-Hallman Road.
- Two new GRT bus stops on each side of Westmount Road at Tillsley Drive serving Route 12 and Route 22.
- Permanent traffic control signals at the intersection of Westmount Road and Tillsley Drive (to replace the temporary traffic signals installed in 2023).
- Intersection improvements at Westmount Road/Fischer-Hallman Road and Westmount Road/Block Line Road.

We are currently in the detailed design phase for this project with construction planned for 2026. However, the timing of capital projects is reviewed annually by the Region and is subject to change. The consulting engineering firm, WalterFedy, has been hired by the Region to provide engineering design services for this project.

Additional information regarding this project will be provided through future notices to area residents and updates on the Region's website at [regionofwaterloo.ca/construction](http://regionofwaterloo.ca/construction). Please contact me if you have any questions related to this project.

Yours truly,

**Karolina Krol, M.Sc., P.Eng.**
