Dear Sir/Madam:

Subject: Contamination Overview Study Stage 2 ION LRT Transit Project Assessment

We are pleased to submit this Contamination Overview Study for the Stage 2 ION LRT Transit Assessment.

The Contamination Overview Study was completed to provide a high-level overview of potential sources of contamination for properties within the Stage 2 ION route and a 250 metre buffer from the alignment. The report describes the interpreted environmental conditions provides recommendations for further environmental investigations.

If you have any questions or comments on the report, please contact the undersigned at 905-829-6255.

Yours sincerely,

Anne Pattison, B.Sc., G.I.T.
Environmental Scientist

Derek Stewart, M.Sc., P. Geo.,

B	ECOLOG ERIS REPORT

EXECUTIVE SUMMARY

WSP Canada Group Limited (WSP) was retained by the Regional Municipality of Waterloo (hereafter referred to as “the Region”) to conduct a Contamination Overview Study (COS) as a component of the Environmental Assessment, planning and preliminary design for the Stage 2 ION Light Rail Transit (LRT) system in Kitchener and Cambridge, Ontario. The Stage 2 ION route extends from the Fairway Station at Fairview Park Mall in Kitchener, and ends at Bruce Street between Ainslie Street and Water Street in Downtown Cambridge. Stage 2 is an extension of the Region’s ION service, which currently operates between Conestoga Station in Waterloo and Fairview Station in Kitchener. The Stage 2 ION route is hereafter referred to as “the corridor”. For purposes of this study, a 250 metre buffer zone from the centre of the Council endorsed alignment (referred to as the “Study Area”) was added to account for migration of contaminants from properties/areas adjacent to the proposed Right-of-Way (ROW). The location and extents of the corridor and associated Study Area are shown on **Figure 1**.

The principal objective of this COS was to identify and review properties/areas whereby the current or historical operations within the Study Area may have contributed to soil and groundwater impacts along the corridor. The completion of the COS was achieved through the completion of a comprehensive records review, Study Area inspection and the documentation of the results in a COS report.

Based on the findings of this report, two hundred and twenty-three (223) Areas of Potential Environmental Concern (APECS) have been identified within the Study Area. The APECS correspond to locations within the Study Area where potential environmental impacts may be present and have been categorized (low, moderate and high) by assessing the overall relative potential of environmental impacts to be present within the subsurface.

Of the two hundred and twenty-three (223) APECS, one hundred and eighty two (182) APECS were identified as having high potential for impacts. These locations include the following land uses: gas stations (active and historical), automotive repair shops (active and historical), dry cleaners (active and historical), industrial manufacturers, railway lines, rail yards, transportation depots, historical coal and oil gasification plants, historical landfills, automobile wrecking, hydro stations, and waste transfer sites.

Recommendations:

- **Property Acquisitions Environmental Due Diligence:** It is recommended that properties identified as high APECS which are directly impacted by the footprint of the proposed route be subject to further environmental studies/investigations to confirm the environmental conditions of such lands in support of both property acquisition environmental due diligence, and road construction excess material management (soil and groundwater). These studies / investigations include Phase One Environmental Site Assessments (ESAs) (and Phase Two ESAs if necessary). If contamination is identified, mitigation measures will need to be developed and implemented which may include environmental site clean-up / remediation, and / or risk assessment. Property acquisitions (full or partial takings) corresponding to locations of high APECS requiring further environmental studies / investigations are shown on **Figures 2 to 9**.

Should the location and extent of proposed property acquisitions (full or partial takings) be modified from those identified in this report, the extent of property impacts must be re-assessed against the identified APECS on **Figures 2 to 9**, and further environmental studies / investigations may be required.

- **Road Construction and Management of Surplus/Excess Soil:** With respect to road construction activities and management of excess soil and groundwater, WSP recommends that a contaminant investigation, where excavation is proposed, be carried out by a qualified environmental consultant to assess soil quality (and, if necessary, groundwater quality) in construction areas adjacent to APECs with high potential for contamination. This recommendation should be reviewed and refined during design stages to evaluate the extent of indirect impacts posed by high APEC properties adjacent to the construction footprint.

Of the two hundred and twenty-three (223) APECs, forty-one (41) APECS were identified as having moderate potential for impacts. These areas represent land uses that are commercial/light industrial properties suspected of using chemical compounds of performing activities that may impact soil and/or groundwater within the Study Area according to O. Reg. 153/04 as amended.

Recommendations:

- **Property Acquisitions Environmental Due Diligence:** It is recommended that properties identified as moderate APECs which are directly impacted by the footprint of the proposed route be subject to further environmental studies/investigations to confirm the environmental conditions of such lands in support of both property acquisition environmental due diligence, and road construction excess material management (soil and groundwater). These studies / investigations include Phase One Environmental Site Assessments (ESAs) (and Phase Two ESAs if necessary). If contamination is identified, mitigation measures will need to be developed and implemented which may include environmental site clean-up / remediation, and / or risk assessment. Property acquisitions (full or partial takings) corresponding to locations of moderate APECS requiring further environmental studies / investigations are shown on **Figures 2 to 9**.

Should the location and extent of proposed property acquisitions (full or partial takings) be modified from those identified in this report, the extent of property impacts must be re-assessed against the identified APECS on **Figures 2 to 9**, and further environmental studies / investigations may be required.

- **Road Construction and Management of Surplus/Excess Soil:** With respect to road construction activities and management of excess soil and groundwater, WSP recommends that a contaminant investigation, where excavation is proposed, be carried out by a qualified environmental consultant to assess soil quality (and, if necessary, groundwater quality) in construction areas adjacent to APECs with moderate potential for contamination. This recommendation should be reviewed and refined during design stages to evaluate the extent of indirect impacts posed by moderate APEC properties adjacent to the construction footprint.

All other areas not included as APECs indicate land use features considered to have low potential for environmental impacts. The areas are generally classified as natural areas, open space, residential, institutional, or community land use, which are not suspected of using chemical compounds harmful to the environment or human health.

Recommendations:

- No additional environmental investigations are recommended for APECs with a low potential for environmental impacts.

1 INTRODUCTION

1.1 BACKGROUND

WSP Canada Group Limited (WSP) was retained by the Regional Municipality of Waterloo (“the Region”) to conduct a Contamination Overview Study (COS) as a component of the Environmental Assessment, planning and preliminary design for the Stage 2 ION Light Rail Transit (LRT) system. The Stage 2 ION route extends from the Fairway Station at Fairview Park Mall in Kitchener, Ontario to Bruce Street between Ainslie Street and Water Street in Downtown Cambridge, Ontario. Stage 2 is an extension of the Region’s ION service, which currently operates between Conestoga Station in Waterloo, Ontario and Fairway Station in Kitchener. The Stage 2 ION route is hereafter referred to as “the corridor”. In determination of the Study Area, a 250 metre (m) buffer zone was added to either side of the Council endorsed alignment for Stage 2 ION to account for migration of contaminants from properties/areas adjacent to the proposed Right-of-Way (ROW). The location and extents of the corridor and associated Study Area are shown on **Figure 1**.

It should be noted that this COS is intended as a broad level assessment of actual and potential sources of site contamination within a given area and is based solely on the known current and former land uses/activities within and surrounding the corridor. This study is not a full environmental liability assessment of each property potentially impacted by the undertaking, and it does not constitute a Phase One Environmental Site Assessment (ESA) as defined by the Canadian Standards Association (CSA Z768-01), and Ontario Regulation (O. Reg.) 153/04, as amended.

1.2 PROJECT OBJECTIVE

The principal objective of the COS is to identify and review properties/areas with actual or potential sources of contamination that may impact the proposed improvements; and to identify appropriate future environmental studies and mitigation measurements required to be implemented during the design and construction phases of the project.

For the purposes of this study, contamination is defined as a material or condition present in the soil, groundwater, or surface water, which may have an adverse effect on human health or the natural environment (e.g. soil, water, and land).

1.3 SCOPE OF WORK

The scope of work undertaken for this COS included the following tasks:

RECORDS REVIEW

- Review of Physiographic, Geological and Hydrogeological Maps and reports – to identify the general physiography, geology, and hydrogeology within and surrounding the Study Area in an effort to understand the fate of any actual or potential site contamination;
- Review of Existing Reports and Historical Records – to review any relevant environmental information previously collected for the Study Area and surrounding properties;

- Review of Aerial Photographs – to identify areas of potential environmental concern within and adjacent to the Study Area;
- Review of Private Source Data through an EcoLog Environmental Risk Information Services (ERIS) Report - to provide relevant information on private and retail fuel storage tanks, automotive wrecking and supply facilities, waste disposal sites (including Certificates of Approval), and Regulation 347 registered waste generators; and
- Review of Municipal and Regional Data – to identify any potentially contaminated sites located within the Study Area.

STUDY AREA RECONNAISSANCE

Completion of a Study Area reconnaissance to broadly identify properties/areas that pose a potential for site contamination, either based on the nature of their operations/land use (e.g. service stations, industrial areas) or by visual evidence of contamination (e.g. piles of waste and fill, surface staining). This inspection was limited to non-intrusive roadside inspection on publicly accessible lands.

REPORTING

Compilation, evaluation and discussion of key findings through a thorough review of all information gathered pertaining to the Study Area and undertaking, concluding remarks on the presence/probability of actual or potential contamination within the Study Area, recommendations for any follow-up work, and written documentation of the results into this COS report.

2 STUDY AREA DESCRIPTION AND SETTING

2.1 DESCRIPTION OF THE STUDY AREA

The corridor includes an approximately 17-kilometre (km) route extending from the existing ION Fairway Station at Fairview Park Mall in Kitchener, Ontario to Bruce Street at Water Street in Downtown Cambridge, Ontario. The proposed corridor alignment approximately follows Fairway Road, Highway 8 and King Street West in Kitchener, crosses the Speed River and continues along Eagle Street, Hespeler Road, Wellington Street and Bruce Street. Sections of the proposed corridor also follow a currently unused CP line and a CN line through portions of North Cambridge (Preston) and Downtown Cambridge (Galt). The Study Area includes a 250 metre (m) buffer on either side of the proposed route to account for migration of contaminants from properties/lands adjacent to the corridor. **Figure 1** shows the limits of the Study Area.

2.2 CURRENT SURROUNDING LAND USE

Land use within the Study Area is primarily composed of commercial, residential, and industrial with some parkland, community and institutional properties. Natural heritage areas within the Study Area include the Grand River, Speed River and associated Wetland Complex, Hidden Valley Wetland, Lower Freeport Creek Wetland Complex, and Dumfries Conservation Area. The natural heritage areas contain Provincially Significant Wetlands (PSW) which are protected from development under the Provincial Policy Statement (2014) under Section 3 of the Planning Act. The corridor follows portions of active and former railway land in Cambridge and Kitchener.

2.3 TOPOGRAPHY AND DRAINAGE

The Study Area lies within the Grand River Watershed, which includes the lands drained by the Grand River and its associated tributaries. According to Natural Resources Canada Map 40P/08, the topography within the study area ranges from approximately 280 to 320 metres above sea level (masl), with low-lying areas adjacent to the banks of the rivers. Water crossings include the Grand River and Speed River with several wetlands within or adjacent to the corridor and Study Area. Storm water run-off within the Study Area is conveyed into municipal storm sewers, and drains naturally into the rivers and wetland complexes.

2.4 PHYSIOGRAPHY

According to Chapman and Putnam's "The Physiography of Southern Ontario, Third Edition" (1984; 2007), the Study Area is located with the physiographic regions known as the Waterloo Hills and Guelph Drumlin Field with physiographic features including kame moraines, till moraines, and spillways. The Waterloo Hills region is composed of sandy hills, sandy till and kames or kame moraines. The Waterloo Hills are adjacent to the spillways of the Guelph Drumlin Field containing drumlins made of stony tills and gravel terraces in the spillways (Chapman and Putnam, 1984; 2007).

2.5 GEOLOGY

2.5.1 SURFICIAL GEOLOGY

According to the publication “Quaternary Geology of Ontario” (OGS Map 2556, 1991) and “Soil Associations Map Waterloo County” (Presant and Wicklund, 1971) surficial soils consist of coarse and medium sandy loams, recent stream deposits and outwash gravels. Quaternary deposits include till, lacustrine and outwash sand, and ice-contact gravel. Soils in the Study Area include till deposits of Port Stanley Till, Maryhill Till, and Catfish Creek Till.

2.5.2 BEDROCK GEOLOGY

According to the publication “Bedrock Geology of Ontario” (OGS, 2011) the Study Area is underlain by Middle and Lower Silurian age sandstone, shale, dolostone, and siltstone of the Guelph Formations, and the Upper Silurian dolomite, shale, gypsum, and salt beds of the Salina Formation. Bedrock topography within the Study Area ranges from approximately 250 to 280 masl (OGS, 1985).

2.6 HYDROGEOLOGY

2.6.1 OVERBURDEN AQUIFER

Aquifers in the Waterloo Region include the Upper Waterloo Moraine, a glacial aquifer system composed of fine to medium sand, the Lower Waterloo Moraine consisting of sand and gravel, the Pre-Catfish Creek Aquifer consisting of stratified sands and gravels, and the Pre-Canning aquifer consisting of discontinuous sand and gravels (Groundwater Information Network, 2014). Much of the water supply in Waterloo Region is derived from the Waterloo Moraine aquifers (Martin & Frind, 2005).

2.6.2 BEDROCK AQUIFER

The main bedrock aquifer in the Study Area is Guelph Formation, described in **Section 2.5.2**, composed of crystalline dolostone deposits of Upper Silurian age. Cambridge obtains much of its municipal water supply from fractures in this bedrock aquifer which locally acts as a confined or semi-confined aquifer (Groundwater Information Network, 2014).

3 RECORDS REVIEW

3.1 EXISTING REPORTS

- i) LGL Limited Environmental Research Associates. June 2016. *Draft Natural Heritage Report Stage 2 ION LRT Transit Project Assessment Process*. Prepared for WSP – Parsons Brinkerhoff.

Relevant findings of this report include:

- Several Species at Risk, Dumfries Conservation Area, Provincially Significant Wetlands, and an Environmentally Sensitive Policy Area are located within the Study Area. The Grand River and its tributaries form the Natural Heritage System of Kitchener and Cambridge.
- Woodlands, wetlands, and shorelines are protected by the Region of Waterloo and the Grand River Conservation Authority (GRCA). Permits will be required prior to developing areas which are classified under these jurisdictions.

- ii) PARISH Aquatic Services. August 2016 (draft). *Fluvial Geomorphic Assessment – Stage 2 ION LRT TPAP Region of Waterloo*. Prepared for WSP Parsons Brinckerhoff.

Relevant findings of this report include:

- Water crossings within the Study Area include the Grand River, Freeport Creek, Sulphur Creek, Speed River, West Creek, and Mill Creek.
- Bedrock geology in the Study Area consists of the Salina Formation containing dolomite, shale, gypsum and salt, and the Guelph Formation containing dolomite. Quaternary deposits include Port Stanley Till, Maryhill Till, and Catfish Creek Till, lacustrine and outwash sand, and ice-contact gravel. Surficial soils consist of coarse and medium sandy loams, recent stream deposits and outwash gravels. The Freeport Esker, composed of glacial sand and gravel deposits, runs between Highway 8 and the CPR and is an Earth Science Area of Natural and Scientific Interest (ANSI).

- iii) Morrison Hershfield Limited. November 2008. Environmental Existing Conditions and Impact Assessment Report – Highway 8 Transportation Corridor, from 1.0 km North of the Grand River Bridge to Highway 40. Prepared for Ontario Ministry of Transportation.

Relevant findings of this report include:

- Historically, four (4) species at risk, the silver shiner (*Notropis photogenis*) and black redbreast (*Moxostoma duquesnei*), wavy-rayed lampmussels (*Lampsilis fasciola*), and rainbow mussels (*Villosa iris*) have been observed in the Grand River. These species are protected under one or more of the *Fisheries Act*, *Species at Risk Act*, and the Provincial Policy Statement of the *Planning Act*.
- Four rare bird species, Henslow's sparrow (*Ammodramus henslowii*), the loggerhead shrike (*Lanius ludovicianus*), Acadian flycatcher (*Empidonax virens*) and the Red-shouldered hawk (*Buteo lineatus*) have been documented in the area which encompasses Highway 8 from Highway 7 south to Highway 401.
- The Jefferson salamander (*Ambystoma jeffersonianum*) has been documented in the Grand River within the Municipality of Waterloo. It is considered "Threatened" by COSEWIC and the MNR, and is protected by the *Species at Risk Act* and the *Fish and Wildlife Conservation Act*.
- Environmentally Sensitive Areas include the Hidden Valley Wetland Complex and the Freeport Esker.

3.2 AERIAL PHOTOGRAPHS

Aerial photographs for the years 1945, 1955, and 1963 were obtained from the University of Waterloo online Air Photos Digitization project. Aerial photography for the years 1997, and 2007 were obtained from the City of Kitchener online interactive mapping application. Aerial photographs from the year 2017 and 2018 were obtained from the Region of Waterloo online interactive mapping website. See **Appendix A** for the aerial photography images referenced in this section. Significant observations noted within the Study Area are included in **Table 1** below.

Table 1 - Summary of Aerial Photography

AERIAL YEAR	OBSERVATIONS
1945	The aerials from 1945 show the Study Area is primarily agricultural land / open space, with some residential dwellings. Fairway Road is not yet developed and appears to be primarily agricultural land use. The CP railway line is visible parallel to Highway 8 / King Street East in Kitchener and appears to cross the Grand River in the area of the current Grand View Woods South / Deer Ridge Golf Club. King Street East / Coronation Boulevard in Cambridge appears built-up with residential, commercial, and some industrial buildings. The visible portion of Hespeler Road does not appear to be developed. The area which is now called the Dumfries Conservation Area appears moderately forested. The former CP Railway line (historically the Great Western Railway line) appears to cross Dundas Street in Cambridge and extend into the Galt area of Cambridge. Galt appears heavily developed with residential and commercial buildings, and industrial operations flanking the railway.
1951/1955	In 1955, the area of Fairway Road and King Street East in Kitchener appears to have a slight increase in the number of residential dwellings, however the surrounding land appears to still be agricultural / open space. An increased number of residential dwellings appear to have been built along Edgehill Drive (parallel to King Street East) east of what is now Riveredge Golf Course. Additional commercial or industrial buildings appear to be present at the current location of the Delta intersection in Cambridge (Hespeler Road / Water Street, and Dundas Street / Coronation Boulevard). Galt appears to be developed similarly to the 1945 aerial photograph.
1963/1966	Industrial buildings appear in the location of Wilson Ave, Goodrich Drive and Wabanaki Drive in Kitchener. Highway 8 appears to have been built in the area of Fairway Road and King Street East in Kitchener. Fairview Park Mall is visible along Fairway Road South. A hydro station enclosure appears to be present on the southeast side of Fairway Road South, across from Fairview Park Mall. Commercial buildings appear in the Sportsworld Crossing plaza southwest of King Street East. The Highway 401 and King Street East/Hwy 8 interchange is visible crossing the Grand River and Shantz Hill Road / King Street East, west of Preston Heights. The property that is currently the Doon Valley Golf Course appears to now have been developed from agricultural land to a golf course. Preston High School and St. Joseph Catholic Elementary School appear to be developed in Preston. The agricultural land on the east side of Coronation Road appears to be developed with residential properties.
1975/1977	Additional commercial and residential properties surround Fairview Park Mall in former vacant or agricultural land. Properties on the north and south sides of Shantz Hill Road appear to have developed from agricultural to residential land use. The Highway 401 and Hespeler Road interchange is developed and the west side of Hespeler Road at Highway 401 appears to be

	under development as large patches of bare land are visible. Commercial and industrial buildings appear along Hespeler Road and Industrial Road in Cambridge.
1982	Continued development of commercial plazas appears along Hespeler Road. The Kitchener portion of the Study Area is similarly developed as in the 1977 aerial photograph. Galt area appears to be similar to the 1955 aerial photograph. An increased number of residential dwellings are visible along Moscrip Road, north of the CN Railway and east of Hespeler Road in Cambridge.
2006	The Hidden Valley Pump Station is visible adjacent to the Grand River on Hidden Valley Road in Kitchener. A residential neighbourhood appears to be under construction along Hidden Valley Road. A residential neighbourhood is visible along Deer Ridge Drive in Kitchener. Highway 8 appears to have been developed behind the Sportsworld Drive commercial complex. The commercial shopping centre north of Pinebush Road and east of Hespeler Road is developed on what is inferred to be formerly agricultural land. Can-Amara Parkway appears to be under construction. The former CP Railway line which formerly ran parallel to Beverly Street in Galt appears to now be decommissioned. A new residential neighbourhood appears in the Linden Drive area along the east bank of the Grand River south of Highway 401 in Cambridge.
2017/2018	Can-Amara Parkway in Cambridge is now built. An increased number of residential properties are visible along Hidden Valley Road in Kitchener. A plot of undeveloped land has been developed to hold the Kitchener VIP Cinemas along Fairway Road. An extension of the Preston Heights neighbourhood along Linden Drive appears along the east bank of the Grand River south of Highway 401 in Cambridge. The industrial building and materials storage yard at 201 Beverly Street appears to have been demolished, and all items previously stored in the yard are removed. Hespeler Road and Galt areas of Cambridge appear to be similarly developed as the 2006 aerial photograph.

3.3 ERIIS ENVIRONMENTAL AND HISTORICAL INFORMATION

The Ecolog ERIIS (ERIS) system provides information from federal, provincial and private source databases relating to a defined search area. Each database is divided into records that present information such as company names, addresses, descriptions, status and other pertinent information. Records that fall within a defined kilometer radius of the search area are extracted from the database for review. Records that are not able to be plotted due to incomplete or inaccurate location information are listed in the Unplottable Summary – these records may or may not be within the Study Area. A copy of the ERIIS report obtained for the Study Areas is provided in **Appendix B**.

The search results of ERIIS databases identified 2,551 records with known locations within the Study Area and 464 records within the Unplottable Summary. **Table 2** summarizes the list of ERIIS records. Some notable records are outlined below.

- Anderson's Waste Disposal Sites:
 - Two records for the Russ Street Dump (no municipal address) approximately 60 m northeast of the corridor, a closed waste disposal site at the end of Russ Street in Cambridge;
 - One record for the Margaret Street Dump (no municipal address), a closed waste disposal site located approximately 240 m east-northeast of the corridor in Cambridge; and
 - One record for Kayson Plastics Fill (no municipal address) located approximately 250 m east-northeast of the corridor in Cambridge.
- Automobile Wrecking and Supplies:

- One record for 37 Beverly Street, Cambridge, noted to be the location of scrap metals;
- Two records for 25 Walnut Street, Cambridge, noted to be the location of automobile wrecking and recycling; and
- One record for 6 Pretoria Road, Cambridge, noted to be the location of used and rebuilt automobile parts and supplies.
- TSSA Expired Facilities:
 - Thirteen (13) records for 4580 King Street East, Kitchener, for expired liquid fuel tanks and piping from a gasoline service station; and
 - Twenty-nine (29) records for 299 Hespeler Road, Cambridge, for expired liquid fuel tanks and piping from a gasoline service station.
- Ontario Spills:
 - Highway 401 and Highway 8, Kitchener, approximately 2 m northwest of the corridor. In 2018, a spill of 500 L of diesel fuel to the road and ditch was reported due to a collision;
 - Highway 8 at Sportsworld Drive, Kitchener, approximately 6 m west-northwest of the corridor.
 - In 2009 a spill of 350 L of diesel to the ground from a transport truck was confirmed to impact soil, air, and surface water; and
 - In 1999 50 L of diesel onto the road shoulder was spilled due to a container leak, and soil contamination was confirmed.
 - 4283 King Street East, Kitchener. In 2003 a spill of 136 L of diesel to asphalt was reported, and possible contamination was indicated; and
 - 4370 King Street East, Kitchener. In 1994 a spill of 180 diesel to gravel was reported to have confirmed soil contamination.
- Compliance and Convictions:
 - The property owner of 62 Ainslie Street South, Cambridge, was fined for failing to comply with an order from the Ministry of Environment to retain a consultant to delineate the extent of contamination due to rusted petroleum hydrocarbon (PHC) and perchloroethylene (PCE) underground storage tanks from a former dry-cleaning operation. This address is listed as generating halogenated solvent waste as recently as 2012.
- Waste Generators:
 - Forty (40) records for 695 Industrial Road, Cambridge, located approximately 25 m east-northeast of the corridor. The property is listed as a machine shop and metal fabricator. Wastes generated include oil skimmings and sludges, emulsified oils, paint/pigment/coating residues, aromatic solvents, waste oils and lubricants, and alkaline wastes – other metals.
 - Twenty-five (25) records for 520 Collier MacMillan Drive, Cambridge located approximately 2409 m east of the corridor. The property is listed as a machine shop for plate work and structural product manufacturing. Wastes generated include acid wastes – heavy metals, waste oils and lubricants, petroleum distillates, aromatic solvents, halogenated solvents, and oil skimmings and sludges.

Table 2 - Summary of Environmental Information Presented in ERIS Database

ERIS DATABASE	# RECORDS	LOCATIONS	SIGNIFICANCE OF FINDINGS
Anderson's Waste Disposal Sites	4	- Two (2) records for Russ Street Dump; - One (1) record for Margaret Street Dump; and - One (1) record for Kayson Plastics Fill.	High
Automobile Wrecking & Supplies	4	- One (1) record for 37 Beverly Street, Cambridge; - Two (2) records for 25 Walnut Street, Cambridge; and - One (1) record for 6 Pretoria Road, Cambridge.	High
Certificates of Approval (CA)	134	The ERIS report listed one hundred and thirty-four (134) records for Certificates of Approval (CA) for properties along Hespeler Road, Wauchope Avenue, King Street East, Wellington Street, Fountain Street, Gateway Park Drive, Sportsworld Drive, Samuelson Street, Eagle Street North, and Coronation Boulevard. CAs were issued for municipal and private sewage, industrial air, and municipal and private water.	Moderate
Commercial Fuel Oil Tanks	8	- One (1) record for 249 Abraham St., Cambridge; - One (1) record for 430 King St East, Cambridge; - Two (2) records for 16 McKenzie St., Cambridge; - Three (3) records for 105 Wellington St., Cambridge; and - One (1) record for 25 Wauchope Ave., Cambridge.	High
Inventory of Coal Gasification Plants and Coal Tar Sites	1	One (1) record for 498 Eagle St, Cambridge	High
Compliance and Convictions	1	One (1) record for 62 Ainslie Street, Cambridge	High
Certificates of Property Use	5	- One (1) record for 13-17 Beverly Street, Cambridge; - One (1) record for 61-69 Ainslie Street South, Cambridge; - One (1) record for 185 King Street East, Cambridge; - One (1) record for 668 Hespeler Road, Cambridge; and - One (1) record for 64 Grand Avenue South, Cambridge.	Moderate to High

ERIS DATABASE	# RECORDS	LOCATIONS	SIGNIFICANCE OF FINDINGS
Dry Cleaning Facilities	1	One (1) record for 26 Ainslie St N, Cambridge	High
Environmental Activity and Sector Registry	7	- Two (2) records for 355 Hespeler Rd., Cambridge; - Two (2) records for 208 Hespeler Rd., Cambridge; - One (1) record for 4438 King St. E., Kitchener; - One (1) record for 500 Collier MacMillan Dr., Cambridge; and - One (1) record for 1574 Eagle St. N., Cambridge	Low to Moderate
Environmental Registry (EBR)	43	The ERIS report listed forty-three (43) records for the Environmental Registry (EBR) for properties on Industrial Road, Hespeler Road, Samuelson Street, Roxboro Road, King Street West, King Street East, Spruce Street, Sheldon Drive, Beverly Street, Ainslie Street, Eagle Street North, Bishop Street North, Collier MacMillan Drive, and Coronation Boulevard. EBR records were listed for approval for discharge to air, sewage works, and liquid fuel handling.	Low, Moderate, and High
Environmental Compliance Approval	39	The ERIS report listed thirty-nine (39) records for Environmental Compliance Approvals (ECA) for properties on Industrial Road, King Street East, Hespeler Road, Eagle Street North, Ainslie Street, Water Street, Concession Street, Frederick Street, Samuelson Street, Spruce Street, Dickson Street, Wilson Avenue, Sportsworld Drive, Wagon Street, Bishop Street, and Coronation Boulevard. Records included industrial air, municipal and private sewage works, and waste management systems approvals.	Moderate
List of TSSA Expired Facilities (EXP)	273	The ERIS report listed two hundred and seventy-three (273) records for TSSA expired facilities (EXP) for properties on Hespeler Road, King Street East, Fountain Street South, Beverly Street, Dundas Street, Abraham Street, Bishop Street North, Sportsworld Drive, Eagle Street North, Samuelson Street, and Fairway Road. Records included liquid fuel tanks at gasoline stations, fuel storage facilities, and fuel storage piping.	High
Fuel Storage Tank	52	- Three (3) records for 105 Hespeler Rd., Cambridge; - Two (2) records for 145 Hespeler Rd., Cambridge; - Four (4) records for 4574 King St. E., Kitchener;	High

ERIS DATABASE	# RECORDS	LOCATIONS	SIGNIFICANCE OF FINDINGS
		• Three (3) records for 239 Fountain St., Cambridge; • Four (4) records for 4319 King St. E./Hwy 8, Kitchener; • Three (3) records for 55 Beverly St., Cambridge; • Six (6) records for 277 Hespeler Rd., Cambridge; • Two (2) records for 176 Hespeler Rd., Cambridge; • Four (4) records for 2138 Eagle St. N., Cambridge; • Two (2) records for 4195 King St. E., Kitchener; • Two (2) records for 310 Industrial Rd., Cambridge; • Two (2) records for 790 Industrial Rd., Cambridge; • Four (4) records for 406 King St. E., Cambridge; • Three (3) records for 75 Main St., Westmeath TWP; • Three (3) records for 1310 Bishop St., Cambridge; • Two (2) records for 184 Samuelson St., Cambridge; and • Three (3) records for 22 Concession St., Cambridge;	
Fuel Storage Tank – Historic (FSTH)	36	The ERIS report listed thirty-six (36) records for historic fuel storage tanks (FSTH) for properties on Hespeler Road, King Street East, King Street West, Fountain Street South, Eagle Street North, Wellington Road, Industrial Road, Bishop Street North, Edgehill Drive, Beverly Street, Samuelson Street, and Concession Street. FSTH records included private and retail gasoline stations for gasoline, diesel, and aviation fuel.	High
Ontario Regulation 347 Waste Generators Summary	1,125	The ERIS report listed 1,125 records for waste generators within the Study Area.	Low, Moderate, and High
TSSA Historic Incidents	6	• One (1) record for 164 Beverly Street, Cambridge; • One (1) record for 105 Hespeler Road, Cambridge; • One (1) record for 4574 King Street East, Kitchener;	Moderate to High

ERIS DATABASE	# RECORDS	LOCATIONS	SIGNIFICANCE OF FINDINGS
		- One (1) record for 944 Caledonian View, Cambridge; - One (1) record for 4195 King Street East, Kitchener; and - One (1) record for 6 McNaughton Street, Cambridge.	
TSSA Incidents	7	- One (1) record for 164 Beverly Street, Cambridge; - One (1) record for 105 Hespeler Road, Cambridge; - One (1) record for 4574 King Street East, Kitchener; - One (1) record for 944 Caledonian View, Cambridge; - One (1) record for 4195 King Street East, Kitchener; - One (1) record for 6 McNaughton Street, Cambridge; and - One (1) record for 3763 King Street East, Kitchener.	Moderate to High
Landfill Inventory Management Ontario	1	One (1) record for the vicinity of 261 Hespeler Road, northwest of Glenbrook Crescent, adjacent to Conestoga Boulevard, Cambridge.	High
National Analysis of Trend in Emergencies System	1	One (1) record for fuel oil leaking into the Mill Creek from Newlands Textiles (no address).	Low
National Environmental Emergencies System	2	- One (1) record for Newlands Textiles, Cambridge (no address); and - One (1) record for Dover Flour Mills, Cambridge (no address).	Moderate
National PCB Inventory	33	- Three (3) records for 310 Fairway Rd South, Kitchener; - Five (5) records for 498 Eagle Street North, Cambridge; - Two (2) records for 62 Dickson Street, Cambridge; - Four (4) records for 185 King Street East, Cambridge; - One (1) record for 401 Eagle Street, Cambridge; - Four (4) records for 475 Witmer Street, Cambridge;	Moderate

ERIS DATABASE	# RECORDS	LOCATIONS	SIGNIFICANCE OF FINDINGS
		- Three (3) records for 310 Fairway Road South, Cambridge; - Three (3) records for 225 Fairway Rd, Kitchener; - Six (6) records for 1574 Eagle St, Cambridge; and - Two (2) records for 581 Coronation Blvd, Cambridge.	
National Pollutant Release Inventory (NPRI)	66	The ERIS report listed sixty-six (66) records for the National Pollutant Release Inventory (NPRI) for properties on Hespeler Road, Main Street, Eagle Street North, King Street West, Dundas Street North, Industrial Road, Beverly Street, and Coronation Boulevard. Records included emissions of nitrogen oxides, methane, hydrofluorocarbon, volatile organic compounds, sulphur dioxide, total particulate matter, carbon dioxide, particulate matter less than 10 microns, particulate matter less than 2.5 microns, carbon monoxide, titanium, antimony, cadmium, copper, nickel, cobalt, carbon, chromium, and manganese from various manufacturing companies.	Low to Moderate
Inventory of PCB Storage Sites	34	- Four (4) Records for 400 Eagle Street, Cambridge; - Five (5) records for P.O. Box 3400 498 Eagle Street North, Cambridge; - One (1) record for 62 Dickson Street, Cambridge; - Six (6) records for 185 King Street East, Cambridge; - Seven (7) records for 475 Witmer Street, Cambridge; - One (1) record for 225 Fairway Road South, Kitchener; - Four (4) records for 1574 Eagle Street North, Cambridge; and - Six (6) 581 Coronation Boulevard, Cambridge.	Moderate
Canadian Pulp and Paper	1	One (1) record for 581 Coronation Boulevard, Cambridge.	High
Pesticide Register (PES)	45	The Eris report listed forty-five (45) records for the Pesticide Register (PES) for properties on Hespeler Road, Main Street, Ainslie Street South, Pinebush Drive, King Street East, Sheldon Drive, Fairway Road, and Gateway Park Drive. PES records included commercial vendors, municipal maintenance lots, and landscaping companies.	Low

ERIS DATABASE	# RECORDS	LOCATIONS	SIGNIFICANCE OF FINDINGS
Private and Retail Fuel Storage Tanks (PRT)	54	The ERIS report listed fifty-four (54) records for Private and Retail Fuel Storage Tanks (PRT) for properties along Hespeler Road, King Street East, Fountain Street, Beverly Street, Dundas Street, Bishop Street, Eagle Street, Samuelson Street, Concession Street, Fairway Road, Sportsworld Drive, Gateway Park Drive, and Wellington Road. Records included gasoline service stations, automobile retailers, commercial auto parts retailers, transportation depots, automobile service centres, industrial manufacturers, building materials suppliers, and municipal maintenance lots.	High
TSSA Pipeline Incidents	8	• One (1) record for 175 Hespeler Road, Cambridge; • One (1) record for 4341 King Street, Kitchener; • Two (2) records for 350 Hespeler Road, Cambridge; • One (1) record for 300 Fairway Road South, Kitchener; • One (1) record for 930 Eagle Street, Cambridge; • One (1) record for Fairway Road South & Wilson Avenue, Kitchener; and • One (1) record for 696 Parkview Crescent, Cambridge.	High
Permit to Take Water	3	• One (1) record for 245 Edgehill Drive, Kitchener; • One (1) record for 305 Dundas Street, Cambridge; and • One (1) record for 475 Witmer Street, Cambridge.	Low
Ontario Regulation 347 Waste Receivers Summary	9	• Seven (7) records for 15 Roxboro Road, Cambridge; and • Two (2) records for 62 Dickson Street, Cambridge.	High
Record of Site Condition	47	The ERIS report listed forty-seven (47) records for Records of Site Condition (RSC) for properties on Russ Street, Wellington Street, Kerr Street, Hespeler Road, King Street East, Ainslie Street South, Beverly Street, Abraham Street, Shade Street, Pioneer Tower Road, Water Street South, Witmer Street, Grand Avenue South, Fountain Street South, Collier MacMillan Drive, Fairway Road South, and Eagle Street North. RSCs were issued for industrial,	Moderate

		commercial and residential properties with and without risk assessments.	
Retail Fuel Storage Tanks	26	- One (1) record for 293 Hespeler Road, Cambridge; - Two (2) records for 612 Hespeler Road, Cambridge; - One (1) record for 105 Hespeler Road, Cambridge; - Two (2) records 4574 King Street East, Kitchener; - One (1) records 145 Hespeler Road, Cambridge; - Three (3) records for 55 Beverly Street, Cambridge; - One (1) record for Industrial Road, Cambridge; - One (1) record for 406 King Street East, Cambridge; - Three (3) records for 2465 Eagle Street North, Cambridge; and - Three (3) records for 22 Concession Street, Cambridge.	High
Scott's Manufacturing Directory (SCT)	246	The ERIS report listed 246 records in Scott's Manufacturing Directory (SCT) for various light and heavy industrial manufacturers of plastics, food and beverages, machinery, newspapers and printing, vehicle parts, building supplies, chemicals, textiles, pharmaceuticals, medical supplies, refrigeration and heating equipment, and for coating, plating, engraving and heat treatments.	Moderate to High
Ontario Spills (SPL)	218	The ERIS report listed 218 records for spills and releases of various vehicle and machinery fuel and oils, natural gas, untreated sewage, sediment, and other chemical substances.	Low, Moderate, and High
TSSA Variances for Abandonment of Underground Storage Tanks	2	- One (1) record for 79-87 Spruce St., Cambridge; and - One (1) record for 449 Dundas St., Cambridge.	High
Waste Disposal Sites – MOE CA Inventory	6	Six (6) records for 15 Roxboro Road, Cambridge.	High
Waste Disposal Sites – MOE 1991 Historical Approval Inventory	2	- One (1) record for Russ St., Cambridge; and - One (1) record for Margaret Street, Cambridge.	High

3.4 MINISTRY OF THE ENVIRONMENT, CONSERVATION AND PARKS INFORMATION

3.4.1 COAL GASIFICATION PLANT INVENTORY

The Coal Gasification Plant inventory includes both the “Inventory of Coal Gasification Plant Wastes Sites in Ontario – April 1987” and the “Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario – November 1988”, collected by the Ministry of the Environment, Conservation and Parks (MECP). It identifies industrial sites that produced and continue to produce or use coal tar and other related tars.

According to the ERIS database search, one (1) historical oil gasification plant was located in the Study Area. Preston Woollen Mills, at 498 Eagle Street North, Cambridge is listed as having used a gasification plant during the 1870s until the 1890s. The gas works were demolished in the 1890s, and an office building stands in its former location.

3.4.2 BROWNFIELD ENVIRONMENTAL SITE REGISTRY

The Environmental Site Registry (ESR) is a publicly accessible database documenting any Records of Site Condition (RSC) that have been filed with MECP since the inception of the ESR in October 2004. The RSC documents any environmental site assessment (i.e., Phase One and Phase Two ESAs), site clean-up, and / or site-specific risk-assessment completed at a particular property. This legal instrument is pursuant to O. Reg. 153/04 of Part XV.1 of the Ontario *Environmental Protection Act*. The significance of the ESR relevant to this COS is that it identifies properties that have been investigated for potentially contaminating activities that are in close proximity to the Study Area and therefore have potential for the migration of contaminants.

According to the ERIS database search, there were forty-seven (47) records for RSCs within the Study Area. These records represent thirty-four (34) different properties. RSC properties of note are 293, 295, 299, 668 Hespeler Road which were historical locations of petroleum hydrocarbon (PHC) and/or volatile organic compounds (VOC) contamination to soil or groundwater.

3.4.3 WASTE DISPOSAL SITE INVENTORY (1991)

The MECP maintains an inventory of known open (active or inactive) and closed waste disposal sites (WDS) in the Province of Ontario. “Class A” sites are those that are deemed to have the potential to impact human health because of the proximity to human development; “Class B” sites are those that are deemed to have the potential to impact the environment.

According to the ERIS database search, there are six (6) records for current waste disposal sites within the Study Area. All six (6) records are for B&R Processing Ltd. at 15 Roxboro Road, Cambridge. The amended Provisional Certificate of Approval for this site states the intended use of the site is for the transfer and processing of used oil filters from automobiles.

There are two (2) records for historical approvals for WDS (pre-1991), located on Russ Street and Margaret Street in Cambridge (neither have municipal numerical addresses). The Russ Street site was closed in 1968, and is classified as having rural municipal/domestic waste. The Margaret Street site is listed as “closed” with the closing date unknown.

3.5 FEDERAL CONTAMINATED SITE INVENTORY

The Federal Contaminated Sites Inventory (FCSI) includes information on all known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

According to the ERIS database search, there were no federal contaminated sites within the Study Area.

3.6 CITY OF CAMBRIDGE

The City of Cambridge provided records from their Environmental Records Database layer in their GIS system (OnPoint) regarding potential environmental concerns on properties within the Study Area. Properties representing environmental concern which are not associated with the list of Potentially Contaminating Activities as outlined in O. Reg. 153/04 are listed below:

- 256-258 Hespeler Road – Record in the database for Director’s letter accepting risk assessment (RA) No. 5040-ASERCB on July 5, 2019. Groundwater on the property was determined to not be suitable for potable use. A Certificate of Property Use (CPU) is not required at this time. This property has been identified as a moderate APEC due to the fact that this property has Property Specific Standards related to metals and salt impacts exceeding the MECP Table 1 SCS.
- 27 Jarvis Street – Record in the database that this site was a possible meth lab (June 2, 2010). Police were informed the building division that chemicals were buried/disposed of in the yard. The MECP (formerly MOE) was notified by police. This property has also been identified as an automotive service centre, and therefore remains a high APEC.
- 455 Dundas Street North (Manchester Public School) – Record in the database for Site Investigation Summary by MTE (consulting firm) dated May 28, 2013. Soil results indicate slight exceedances of lead, copper and zinc along northern boundary of site (railway) and TCE in groundwater likely from off-site sources to the west (Dept file SP30/13). Although property use is not of a concern at this site, there is potential soil and groundwater contamination due to off-site sources.
- 170 Norfolk Avenue/160 Samuelson Street – Record in the database on Jan 11, 2013. Public Works was advised that 160 Samuelson Street is not hooked up to sanitary and has been discharging for years to a holding tank which is in the backyard of 170 Norfolk Ave. The property is to be connected to sanitary as per mandatory connection by-law. Depending on containment and maintenance of such a tank, these practices represent a moderate APEC which may warrant further investigation.

4 STUDY AREA RECONNAISSANCE

WSP carried out a site visit of the Study Area on February 11, 2019. The weather was overcast with light snow, and a temperature of around -4 °C. The purpose of the visit was to document land uses and business operations that may represent a potential source of contamination within the Study Area (e.g., gas stations, auto repair facilities, and industrial operations). The results of the site visit have been incorporated into this report. It should be noted that the visit did not include any building inspections or comprehensive exterior inspections of any properties in the Study Area. Therefore, any inferences regarding the presence or absence of contaminating activities are strictly based on visual observations made from the roadside in publicly accessible areas.

Current land uses noted within the Study Area include:

- Commercial plazas and shopping centres including Cambridge Centre mall, CF Fairview Park mall and Sportsworld Crossing;
- Gas stations and automotive repair shops;
- Industrial complexes including machinery fabrication, trucking centres, petroleum fuel product storage and supply, and flour milling;
- CP and CN Railway;
- Dry cleaners;
- Parkland including the Dumfries Conservation Area, Centennial Park, Soper Park, Riverside Park, Ravine Park, Linear Park, the Grand View Woods, and Hidden Valley wetland complex;
- Residential neighbourhoods;
- Youth, cultural and community centres, and religious centres;
- Elementary and high schools; and
- Highway 8.

The results of the inspection showed that the predominant land uses within the Study Area consist of a mixture of residential, commercial, industrial, and parkland, with scattered community and institutional land uses. Photographs of the observations noted during the Study Area reconnaissance are illustrated on **Figures 2 to 9**.

4.1 ACTUAL SOURCES OF CONTAMINATION

No actual sources of contamination were observed during the Study Area reconnaissance.

4.2 POTENTIAL SOURCES OF CONTAMINATION

Several potential sources of contamination were observed during the Study Area reconnaissance. Areas of Potential Environmental Concern (APECs) with high and moderate potential for contamination noted during the Study Area reconnaissance are outlined in the following sections and illustrated on **Figures 2 to 9**.

4.2.1 COMMERCIAL AND INDUSTRIAL LAND USE

Potential soil and groundwater contamination may exist within the Study Area as a result of current and historical commercial/industrial land uses. Below is a list of operations and activities associated with commercial/industrial land uses identified within the Study Area.

FUEL STORAGE TANKS (PRIVATE AND RETAIL)

Automotive centres and gas stations may operate pump islands and have underground storage tanks (USTs) for storing fuel, small storage areas, and occasionally service areas for automobile maintenance. Gasoline and diesel fuel are transferred from bulk container trucks to large USTs. Spills at transfer areas and pumps, along with overfilling of and leakage from the USTs, are potential sources of contamination. According to the study area reconnaissance and the ERIS report, there are nine (9) gas stations, thirty-six (36) historical fuel storage tank locations, fifty-two (52) current fuel storage tank locations, eight (8) commercial fuel oil tanks, two-hundred and seventy-three (273) TSSA Expired Facilities, twenty-six (26) retail fuel storage tanks, and two (2) variances for abandonment of USTs within the Study Area.

Many older rural residential/commercial properties typically use USTs and aboveground storage tanks (ASTs) for heating oil storage and wastewater storage (e.g., septic tanks and tile beds). As such, potential site contamination may exist on these types of properties resulting from leaking, spilling or inappropriate handling practices related to the above activities. The ERIS report listed fifty-four (54) records for private and retail fuel storage tanks.

MANUFACTURING FACILITIES, AND REGISTERED WASTE GENERATORS

A wide range of chemicals are used at facilities that manufacture and distribute parts/products for industrial and commercial use. These chemical products may include acids and bases, dyes and pigments, PCBs, polymers, plastics, surfactants, solvents, soaps, and waxes. These manufacturing processes are highly variable, depending on the product being produced. There are, however, certain types of process components that are frequently encountered in these facilities, including bulk storage for gaseous, liquid and solid materials, blending and packaging equipment, storage areas for drums, waste piles and disposal pits.

Based on the Study Area reconnaissance, several industrial and manufacturing facilities were observed which included trucking distribution centres, CNC machine fabrication, metal fabrication, tooling systems fabrication, manufacturing of railway equipment, lumber products, furniture, nuclear components, soap, flour and distribution of petroleum fuels.

Potential sources of contamination from manufacturing and waste generation include properties listed in the ERIS report which were supported by field observations. According to the ERIS report, there are one thousand, one-hundred and twenty-five (1,125) waste generator records within the Study Area. The ERIS records for waste generators include medical/pharmaceutical industries, auto and machinery service stations, fueling operations, brownfield site remediation wastes, industrial parts manufacturers, plastics manufacturers, flour milling operations, lumber suppliers, trucking operations and commercial businesses. The majority of waste generators with high potential for environmental impact to the Stage 2 ION corridor are located in Cambridge, where there is a high density of current and historical commercial and industrial operations in the vicinity of Ainslie Street, Dundas Street, Industrial Road, Hespeler Road and Eagle Street.

EXISTING RAILWAY LINES

Several factors associated with railways including brake dust, cargo spills, oils and lubricants, and diesel fuels can cause potential environmental concern. Soil contamination may exist within the land on or adjacent to railway tracks as railways are often developed on poor quality fill and ballast material in addition to railway ties being impregnated with creosote compounds.

Existing railway crossings are located within the Study Area at Dundas Street south of Samuelson Street, along Hespeler Road south of Norfolk Ave., at Roxboro Road south of Norfolk Ave., at Eagle Street North northeast of Margaret Street, at King Street West and Rogers Drive, and on Wabanaki Drive and Hidden Valley Road. A railway

yard with piled railway ties and steel rails was observed during site reconnaissance on the northeast side of the Dundas Street bridge over the CP Railway, which straddles Samuelson Street to the north and south, in Cambridge. The proposed route also follows a former CP railway corridor from Main Street to Hespeler Road in Cambridge, a portion of which is utilized as Mill Creek Trail, and a CN Railway industrial spur from north of Eagle Street to Hespeler Road. Figures 2 to 9 outline the extent of the CP and CN former and existing railway lines within the Study Area.

Due to the typical activities and operations associated with railways, there is potential that some or any of their operations may have been released to the environment, impacting the soil and groundwater. The most likely pathway for potential contaminant from these land uses is through perched/shallow groundwater; surface water runoff along drainage ditches, utility conduits (e.g. sewer and water lines); and adjacent watercourses and water bodies.

DRYCLEANERS

Chemicals associated with dry cleaning operations include chlorinated solvents such as tetrachloroethylene. Chlorinated solvents from dry cleaning operations can be released to the environment via accidental spills, improper waste disposal, or container leakage. Chlorinated solvent contamination of soil and groundwater may exist in the vicinity of dry cleaning operations and waste disposal sites.

Two (2) dry cleaning operations were observed within the Study Area during the Study Area reconnaissance. Dry cleaners were observed at 112 Main Street, Cambridge, and 3101 Kingsway Drive in Kitchener. In addition, the ERIS report listed 26 Ainslie Street as generating waste perchloroethylene (tetrachloroethylene) for the years 2004, 2005, 2006, 2008, and 2010. One (1) record for compliance and convictions was listed for 62 Ainslie Street, a former dry-cleaning operation, for a Provincial Officer's Order to delineate contamination relating to leaking tanks of petroleum hydrocarbons and perchloroethylene.

4.2.2 OIL/GAS PIPELINES

Pipelines carrying liquid petroleum products present a risk to the environment. If pipelines are not adequately maintained, leaks and/or spills may occur to the surrounding environment which could impact soil and groundwater. According to publicly available information from the National Energy Board, no liquid petroleum distribution pipelines are located in the Study Area. According to the ERIS report, there have been eight (8) TSSA Pipeline Incidents, and six (6) Historic TSSA Incidents within the Study Area. All incidents were related to strikes of natural gas lines.

4.2.3 GROUNDWATER SUPPLY WELLS

Municipal water distribution in the Region of Waterloo is supplied by municipal groundwater supply wells and the Grand River. Municipal Wellhead Protection Areas corresponding to municipal groundwater intake wells are located within the majority of the Study Area in Cambridge, and a portion of the Study Area along Fairway Road in Kitchener.

Due to the size and urbanized nature of the Study Area, water well records were not included as part of the ERIS search. Well records from the MECP indicate private water wells are located in both Kitchener and Cambridge. The MECP records indicate the majority of these private water wells were for domestic use installed prior to 2000, and date as far back as the 1950s, before portions of the Study Area were urbanized. Private water wells were not

observed during the Study Area reconnaissance as Study Area properties were observed from publicly accessible locations.

4.2.4 VEHICULAR TRAFFIC, ROAD DEBRIS AND SPILLS

The cumulative effects of many years of high road traffic within the Study Area may have resulted in potential soil contamination. This contamination typically results from vehicle exhaust (e.g., lead and other metals), general wear and tear (e.g., heavy metals, oils and lubricants), and winter road maintenance activities (e.g., salting), and is most prevalent on the road shoulders and roadside drainage ditches in areas of high traffic volume.

Highway 8 is an extensively travelled highway that connects Kitchener and Cambridge, and Hespeler Road is a high traffic thoroughfare through Cambridge connecting with Highway 401. Additionally, all roads within the Study Area are the subject of moderate to high vehicle traffic as the corridor for Stage 2 is proposed to service densely populated and highly commercialized portions of Cambridge and Kitchener. The roadways within the Study Area have the potential for residual salt impacts, and metals and petroleum hydrocarbons (PHCs) to be present in the shallow soil and groundwater resulting from winter road salting operations along the road ROW, vehicular exhausts, transportation accidents and spills.

According to the ERIS report, there are two hundred and eighteen (218) spill records in the Study Area, and one hundred and twenty-eight (128) additional spill records with unknown coordinates. No evidence of spills was observed on any roadways in the Study Area, however historical spills may have impacted soil and groundwater quality. It should be noted that significant portions of the ground surface were covered with snow during the Study Area reconnaissance, and as such, visual evidence of spills may have been obstructed.

4.2.5 HYDRO TRANSMISSION CORRIDORS

During the site visit, a hydro transmission corridor and hydro sub-station was observed to run approximately northeast-southwest between Fairway Road South and Hidden Valley Road in Kitchener, across from Fairview Park Mall. A review of historical aerial photography shows patches of barren earth, and progressive clearing of the area over time. Another hydro transmission corridor was observed at the north end of Witmer Street in Cambridge, running east towards the hydro station on McGovern Drive. Aerial photography shows the corridor is maintained free of tree growth which is visible on either side of the hydro lines. Historical spraying of vegetation with pesticides may have occurred within hydro corridors resulting in chemical accumulation in the shallow soil. In addition, corrosion of the galvanized steel towers which support the electrical transmission lines can cause elevated concentrations of zinc of the soil.

4.2.6 WASTE DISPOSAL SITES

The presence of active or closed waste disposal sites within the Study Area presents a potential source of contamination. Substances disposed at landfilling or waste disposal sites may include waste oils, lubricants, paints, PCBs, biomedical wastes and hazardous chemicals. According to the ERIS report there are four records for waste disposal sites within the Study Area. Waste disposal sites are listed as being located at 15 Roxboro Road, Margaret Street, Russ Street near the Speed River, and at Witmer Road and the CNR near Eagle Street in Cambridge (Kayson's Plastics Fill). There is one (1) ERIS record for Landfill Inventory Management Ontario for the closed Newton Landfill (Old Galt Landfill), located in the vicinity of 261 Hespeler Road, Cambridge.

The business located at 15 Roxboro Road is listed as a waste transfer station waste disposal site for used oil filters. The Russ Street dump is a closed site, listed as having municipal solid waste and industrial, commercial and institutional waste, and was adjacent to the former George Pattison & Co. Woolen Mill. The Margaret Street dump is a closed site which does not have a specified waste type, and is described as being “on site industrial buildings of Kanmet Industries” in 1979. The Kayson Plastics Fill site is listed as being active in 1958. It is located near Witmer Street and Eagle Street North and was used for industrial, commercial and institutional waste from Kayson Plastics and Rubber Products.

5 AREAS OF POTENTIAL ENVIRONMENTAL CONCERN

Based on the findings of this report, APECs have been identified within the Study Area and shown in **Figures 2 to 9**. The Land Use categories (left column of **Tables 3 and 4**) include abbreviations in brackets; these abbreviations are used to depict the locations of the APECs on **Figures 2 to 9**. The APECs correspond to the locations in the Study Area, where potential contamination may be present and have been categorized (low, moderate and high) by assessing the overall relative potential of contamination from the findings in **Sections 2.0** through **4.0** of this report.

5.1 APECS WITH HIGH POTENTIAL FOR CONTAMINATION

The APECs with high potential for contamination are shown in **Table 3** below and are illustrated on **Figures 2 to 9** (highlighted in red). The areas represent land uses that are industrial use, landfilling, or commercial properties such as dry cleaners, garages, or gasoline outlets, suspected of using chemical compounds or performing activities that may impact soil and/or groundwater within the Study Area. For reference purposes only, the third column in **Table 3** below and **Table 4** in **Section 5.2** (Potential Contaminating Activity, PCA), categorizes the land uses identified in the second column (Locations of High APECs in Study Area) into applicable PCA classes as described in Ontario Regulation 153/04, as amended.

Table 3 - APECs with High Potential for Contamination in Study Area

LAND USE	LOCATIONS OF HIGH APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY (AS PER ONTARIO REGULATION 153/04) ¹
Gas Stations (GS)	GS1 - 22 Concession Street, Cambridge GS2 - 55 Beverly Street, Cambridge GS3 - 105 Hespeler Road, Cambridge GS4 - 145 Hespeler Road, Cambridge GS5 - 239 Fountain Street, Cambridge GS6 - 4195 King Street East, Kitchener GS7 - 4319 King Street East, Kitchener GS8 - 277 Hespeler Road, Cambridge GS9 - 4574 King Street East, Kitchener	28 – Gasoline and associated products storage in fixed tanks
Automotive Service Centres (AS)	AS1 - 17 Jarvis Street, Cambridge AS2 - 27 Jarvis Street, Cambridge AS3 - 55 Water Street South, Cambridge AS4 - 25 Veterans Way, Cambridge AS5 - 78 Shade Street, Cambridge AS6 - 333 Dundas Street North, Cambridge AS7 - 362 Dundas Street, Cambridge AS8 - 491 Dundas Street North, Cambridge AS9 - 469 Eagle Street North, Cambridge AS10 - 2080 Eagle Street North, Cambridge AS11 - 2200 Eagle Street North, Cambridge	10 – Commercial auto body shops 28 – Gasoline and associated products storage in fixed tanks

LAND USE	LOCATIONS OF HIGH APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY (AS PER ONTARIO REGULATION 153/04) ¹

Automobile Wrecking and Supplies (AW)	AW1 - 25 Walnut Street, Cambridge AW2 - 37 Beverly Street, Cambridge AW3 - 6 Pretoria Road, Cambridge	49 – Salvage Yard, including automobile wrecking
Dry Cleaners (DC)	DC1 - 112 Main Street, Cambridge DC2 - 3101 Kingsway Drive, Kitchener	37 – Operation of dry cleaning equipment (where chemicals are used)
Historical Dry Cleaners (HDC)	HDC1 - 26 Ainslie Street North, Cambridge HDC2 - 62 Ainslie Street South, Cambridge	37 – Operation of dry cleaning equipment (where chemicals are used)
Industrial/Manufacturing (IM)	IM1 - 200 Beverly Street, Cambridge IM2 - 400 Collier Macmillan Drive, Cambridge	1 – Acid and Alkali Manufacturing, Processing and Bulk Storage

LAND USE	LOCATIONS OF HIGH APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY (AS PER ONTARIO REGULATION 153/04) ¹
	IM3 - 470 Collier MacMillan Drive, Cambridge - 480 Collier MacMillan Drive, Cambridge IM4 - 520 Collier MacMillan Drive, Cambridge IM5 - 385 Dundas Street, Cambridge IM6 - 431 Dundas Street, Cambridge IM7 - 449 Dundas Street, Cambridge IM8 - 471 Dundas Street North, Cambridge IM9 - 497 Dundas Street North, Cambridge IM10 - 357 Eagle Street North, Cambridge - 401 Eagle Street North, Cambridge IM11 - 1574 Eagle Street North, Cambridge IM12 - 1902 Eagle Street, Cambridge IM13 - 2094 Eagle Street North, Cambridge IM14 - 51 Grantham Avenue, Cambridge IM15 - 177 Hespeler Road, Cambridge IM16 - 621 Hespeler Road, Cambridge IM17 - 305 Industrial Road, Cambridge IM18 - 330 Industrial Road, Cambridge IM19 - 645 Industrial Road, Cambridge - 655 Industrial Road, Cambridge IM20 - 695 Industrial Road, Cambridge IM21 - 777 Industrial Road, Cambridge IM22 - 955 Industrial Road, Cambridge IM23 - 46 Jaffray Street, Cambridge IM24 - 140 King Street West, Cambridge - 166 King Street West, Cambridge IM25 - 1000 Langs Drive, Cambridge IM26 - 180 McGovern Drive, Cambridge - 176 McGovern Drive, Cambridge IM27 - 162 Samuelson Street, Cambridge IM28 - 175 Samuelson Street, Cambridge IM29 - 187 Samuelson Street, Cambridge IM30 - 76 Spruce Street, Cambridge IM31 - 560 Conestoga Boulevard, Cambridge IM32 - 581 Coronation Boulevard, Cambridge IM33 - 665 Industrial Road, Cambridge IM34 - 170 Beverly Street, Cambridge IM35 - 161 Samuelson Street, Cambridge	5 – Asphalt and bitumen manufacturing 8 – Chemical Manufacturing, Processing and Bulk Storage 12 – Concrete, Cement and Lime Manufacturing 19 – Electronic and Computer Equipment Manufacturing 31 – Ink Manufacturing, Processing and Bulk Storage 32 – Iron and Steel Manufacturing and Processing 33 – Metal Treatment, Coating, Plating and Finishing 34 – Metal Fabrication 40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications 50 – Soap and Detergent Manufacturing, Processing and Bulk Storage 51 – Solvent Manufacturing, Processing and Bulk Storage 59 – Wood Treating Preservative Facility and Bulk Storage of Treated and Preserved Wood Products
Trucking Operations and Transport Depots (TD)	TD1 - 2138 Eagle St. N., Cambridge TD2 - 670 Industrial Road, Cambridge	11 – Commercial Trucking and Container Terminals

LAND USE	LOCATIONS OF HIGH APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY (AS PER ONTARIO REGULATION 153/04) ¹
		28 – Gasoline and associated products storage in fixed tanks
Historical Landfill (HL)	HL1 - Russ Street Dump, Cambridge - 498 Eagle Street North, Cambridge HL2 – 30-535 Margaret Street, Cambridge HL3 – 155 Can-Amera Parkway, Cambridge	30 – Importation of Fill Material of Unknown Quality 58 – Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners
Historical Gas Stations (HGS)	HGS1 - 1310 Bishop Street North, Cambridge HGS2 - 335 Dundas Street North, Cambridge HGS3 - 310 Fairway Road South, Kitchener HGS4 - 176 Hespeler Road, Cambridge HGS5 – 299 Hespeler Road, Cambridge HGS7 – 350 Hespeler Road, Cambridge HGS8 – 612 Hespeler Road, Cambridge HGS9 – 668 Hespeler Road, Cambridge HGS10 – 4580 King Street East, Kitchener HGS11 – 4233 King Street East, Kitchener HGS12 – 4341 King Street East, Kitchener HGS13 – 406 King Street East, Kitchener HGS14 – 75 Main Street, Cambridge HGS15 – 184 Samuelson Street, Cambridge HGS16 - 2401 Eagle Street North, Cambridge HGS17 – 790 Industrial Road, Cambridge HGS18 - 2435 Eagle Street North, Cambridge HGS19 – 49 King Street West, Cambridge HGS20 – 172 King Street West, Cambridge HGS21 – 34 Wellington Street, Cambridge	28 – Gasoline and associated products storage in fixed tanks
Historical Automotive Service Centres (HAS)	HAS1 - 289 Hespeler Road, Cambridge HAS2 - 395 Hespeler Road, Cambridge HAS3 - 293 Hespeler Road, Cambridge HAS4 - 499 Hespeler Road, Cambridge HAS5 - 61 Ainslie Street, Cambridge	10 – Commercial auto body shops 28 – Gasoline and associated products storage in fixed tanks
Historical Industrial/Manufacturing (HIM)	HIM1 - 26 Ainslie Street South, Cambridge HIM2 - 58 Beverly Street, Cambridge HIM3 - 175 Beverly Street, Cambridge HIM4 - 202 Beverly Street, Cambridge - 204 Beverly Street, Cambridge	1 – Acid and Alkali Manufacturing, Processing and Bulk Storage 5 – Asphalt and bitumen manufacturing

LAND USE	LOCATIONS OF HIGH APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY (AS PER ONTARIO REGULATION 153/04) ¹
	HIM5 - 1315 Bishop Street North, Cambridge HIM6 - 1400 Bishop Street, Cambridge HIM7 - 1425 Bishop Street, Cambridge HIM8 - 259 Chopin Drive, Cambridge HIM9 - 500 Collier MacMillan Drive, Cambridge HIM10 - 510 Collier MacMillan Drive, Cambridge HIM11 - 427 Dundas Street South, Cambridge HIM12 - 336 Eagle St. N., Cambridge - 358 Eagle Street N., Cambridge HIM13 - 2126 Eagle Street North, Cambridge HIM14 - 26 Elmwood Avenue, Cambridge HIM15 - 108 Elmwood Avenue, Cambridge HIM16 - 225 Fairway Road South, Kitchener HIM17 - 64 Grand Ave South, Cambridge HIM18 - 87 Grand Ave South, Cambridge HIM19 - 366 Hespeler Road, Cambridge HIM20 - 425 Hespeler Road, Cambridge HIM21 - 551 Hespeler Road, Cambridge HIM22 - 18 Jarvis Street, Cambridge HIM23 - 185 King Street East, Cambridge HIM24 - 223 King Street West, Cambridge HIM25 - 47 Main Street, Cambridge HIM26 - 117 Main Street, Cambridge HIM27 - 32 McKenzie Street, Cambridge HIM28 - 191 Samuelson Street, Cambridge HIM29 - 79 Spruce Street, Cambridge - 85 Spruce Street, Cambridge - 89 Spruce Street, Cambridge HIM30 - 31 Water Street South, Cambridge HIM31 - 35 Water Street South, Cambridge HIM32 - 87 Water Street South, Cambridge HIM33 - 475 Witmer Street, Cambridge HIM35 - 67 Dickson Street, Cambridge HIM36 - 415 Dundas Street, Cambridge HIM37 - 59 Main Street, Cambridge HIM38 - 88 Shade Street, Cambridge HIM39 - 201 Beverly Street, Cambridge HIM40 - 49 Beverly Street, Cambridge HIM41 - 31 Ainslie Street, Cambridge	8 – Chemical Manufacturing, Processing and Bulk Storage 12 – Concrete, Cement and Lime Manufacturing 19 – Electronic and Computer Equipment Manufacturing 31 – Ink Manufacturing, Processing and Bulk Storage 32 – Iron and Steel Manufacturing and Processing 33 – Metal Treatment, Coating, Plating and Finishing 34 – Metal Fabrication 40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications 50 – Soap and Detergent Manufacturing, Processing and Bulk Storage 51 – Solvent Manufacturing, Processing and Bulk Storage 59 – Wood Treating Preservative Facility and Bulk Storage of Treated and Preserved Wood Products
Hydro Station (HY)	HY1 - 75 Fairway Road South, Kitchener	18 – Electricity Generation, Transformation and Power Stations

LAND USE	LOCATIONS OF HIGH APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY (AS PER ONTARIO REGULATION 153/04) ¹
Private Fuel Tanks (PFT)	PFT1 - 245 Edgehill Drive, Kitchener PFT2 - 100 Sportsworld Drive, Kitchener	28 – Gasoline and associated products storage in fixed tanks
Railway Line (RL)	RL1 - CP Railway, Kitchener RL2 & RL4 - CP Railway, Cambridge RL3 - CN Railway, Cambridge RL5 – Former Western Railway Line, currently the Mill Creek Trail, Cambridge	46 – Rail yards, tracks and spurs
Railway Yard (RY)	RY1 - 417 Dundas Street at the CPR Siding, Cambridge RY2 - 150 Samuelson Street, Cambridge	27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles, and Aviation Vehicles 46 – Rail yards, tracks and spurs 57 – Wood Treating and Preservative Facility and Bulk Storage of Treaded and Preserved Wood Products
Waste Transfer and Disposal Sites (WT)	WT1 - 62 Dickson Street, Cambridge; and WT2 - 15 Roxboro Road, Cambridge	58 – Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners
Spills (SP)	SP1 - 160 Hespeler Road, Cambridge SP2 - 3799 King Street East, Kitchener SP3 - 4283 King Street East, Kitchener SP4 - 158 Sekura Crescent, Cambridge SP5 - 103 ½ Water Street South, Cambridge SP6 - Hespeler Road and Pinebush Road, Cambridge SP7 - 4370 King Street East, Kitchener SP8 - 40 Thorne Street, Cambridge	28 – Gasoline and associated products storage in fixed tanks Other – fuel and oil leaks and spills, etc.

Notes: 1. The PCA ID numbers are from Ontario Regulation 153/04, as amended.

Recommendations:

Property Acquisitions Environmental Due Diligence: It is recommended that properties identified as high APECS which are directly impacted by the footprint of the proposed route be subject to further environmental studies/investigations to confirm the environmental conditions of such lands in support of both property acquisition environmental due diligence, and road construction excess material management (soil and groundwater). These studies / investigations include Phase One Environmental Site Assessments (ESAs) (and Phase Two ESAs if necessary). If contamination is identified, mitigation measures will need to be developed and implemented which may include environmental site clean-up / remediation, and / or risk assessment. Property acquisitions (full or partial takings) corresponding to locations of high APECS and requiring further environmental studies / investigations are shown on **Figures 2 to 9**.

Should the location and extent of proposed property acquisitions (full or partial takings) be modified from those identified in this report, the extent of property impacts must be re-assessed against the identified APECS on **Figures 2 to 9**, and further environmental studies / investigations may be required.

Road Construction and Management of Excess Soil and Groundwater: With respect to road construction activities and management of excess soil and groundwater, WSP recommends that a contaminant investigation, where excavation is proposed, be carried out by a qualified environmental consultant to assess soil quality (and, if necessary, groundwater quality) in construction areas adjacent to APECS with high potential for contamination. This recommendation should be reviewed and refined during design stages to evaluate the extent of indirect impacts posed by high APEC properties adjacent to the construction footprint.

5.2 APECS WITH MODERATE POTENTIAL FOR CONTAMINATION

The APECS with moderate potential for contamination are shown in **Table 4** below and are illustrated on **Figures 2 to 9** (highlighted in yellow). The areas represent land uses that are commercial/light industrial properties suspected of using chemical compounds or performing activities that may impact soil and/or groundwater within the Study Area, according to Ontario Regulation 153/04, as amended.

Table 4 - APECS with Moderate Potential for Contamination

LAND USE	LOCATIONS OF MODERATE APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY (AS PER ONTARIO REGULATION 153/04) ¹
Car and Truck Rental (CTR)	CTR1 - 483 Dundas Street, Cambridge	28 – Gasoline and associated products storage in fixed tanks Other – Generation of various wastes
Commercial Plaza (CP)	CP1 - 16 Ainslie Street, Cambridge CP2 - 22 Ainslie Street, Cambridge CP3 - 1300 Bishop Street, Cambridge CP4 - 451 Dundas Street North, Cambridge CP5 - 2211 Eagle Street North, Cambridge CP6 - 50 Gateway Park Drive, Kitchener CP7 - 100 Gateway Park Drive, Kitchener CP8 - 261 Hespeler Road, Cambridge CP9 - 275 Hespeler Road, Cambridge CP10 - 376 Hespeler Road, Cambridge CP11 - 410 Hespeler Road, Cambridge CP12 - 415 Hespeler Road, Cambridge CP13 - 480 Hespeler Road, Cambridge CP14 - 525 Hespeler Road, Cambridge CP15 - 561 Hespeler Road, Cambridge CP16 - 580 Hespeler Road, Cambridge CP17 - 611 Hespeler Road, Cambridge CP18 - 3763 King Street East, Kitchener	8 – Chemical Manufacturing, Processing and Bulk Storage 28 – Gasoline and associated products storage in fixed tanks 40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications Other – Generation of various wastes

LAND USE	LOCATIONS OF MODERATE APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY (AS PER ONTARIO REGULATION 153/04) ¹
	CP19 - 4391 King Street East, Kitchener CP20 - 10-15 Sheldon Drive, Cambridge CP21 - 1 Hespeler Road, Cambridge CP22 - 355 Hespeler Road, Cambridge CP23 - 335 Hespeler Road, Cambridge CP24 - 454 Hespeler Road, Cambridge - 450 Hespeler Road, Cambridge CP25 - 2960 Kingsway Drive, Kitchener CP26 - 64 Main Street East, Cambridge CP27 - 82 Main Street, Cambridge CP28 - 120 Main Street, Cambridge CP29 - 35 Pinebush Drive, Cambridge	
Fuel Oil Tanks (FOT)	FOT1 - 249 Abraham St., Cambridge FOT2 - 430 King St East, Cambridge FOT3 - 16 McKenzie St., Cambridge FOT4 - 25 Wauchope Ave., Cambridge FOT5 - 105 Wellington St., Cambridge	28 – Gasoline and associated products storage in fixed tanks
Armoury (A)	A1 - 1 Valour Place, Cambridge/21 Mill Street, Cambridge	20 – Explosives and ammunition manufacturing, production and bulk storage
Certificate of Property Use (CPU)	CPU1 - 13-17 Beverly Street, Cambridge	Other – Known soil and groundwater contamination
Bus Station (BS)	BS1 - 35 Ainslie Street South, Cambridge	Other – fuel and oil leaks and spills, etc.
Other	Other 1 - 256-258 Hespeler Road, Cambridge Other 2 - 455 Dundas Street North, Cambridge Other 3 - 170 Norfolk Avenue/160 Samuelson Street, Cambridge	Other – Activity not included in list of PCAs in O. Reg. 153/04 but warrants further investigation

Notes: 1. The PCA ID numbers are from Ontario Regulation 153/04, as amended.

Recommendations:

Property Acquisitions Environmental Due Diligence: It is recommended that properties identified as moderate APECs which are directly impacted by the footprint of the technically preferred route be subject to further environmental studies/investigations to confirm the environmental conditions of such lands in support of both property acquisition environmental due diligence, and road construction excess material management (soil and groundwater). These studies / investigations include Phase One Environmental Site Assessments (ESAs) (and Phase Two ESAs if necessary). If contamination is identified, mitigation measures will need to be developed and implemented which may include environmental site clean-up / remediation, and / or risk assessment. Property acquisitions (full or partial takings) corresponding to locations of moderate APECS requiring further environmental studies / investigations are shown on **Figures 2 to 9**.

Should the location and extent of proposed property acquisitions (full or partial takings) be modified from those identified in this report, the extent of property impacts must be re-assessed against the identified APECS on **Figures 2 to 9**, and further environmental studies / investigations may be required.

Road Construction and Management of Surplus/Excess Soil: With respect to road construction activities and management of excess soil and groundwater, WSP recommends that a contaminant investigation, where excavation is proposed, be carried out by a qualified environmental consultant to assess soil quality (and, if necessary, groundwater quality) in construction areas adjacent to APECS with moderate potential for contamination. This recommendation should be reviewed and refined during design stages to evaluate the extent of indirect impacts posed by moderate APEC properties adjacent to the construction footprint.

5.3 APECS WITH LOW POTENTIAL FOR CONTAMINATION

All other areas not highlighted on **Figures 2 to 9** indicate land use features considered to have a low potential for site contamination. The areas are generally classified as natural areas, open space, residential, institutional, or community land use, which are not suspected of using chemical compounds harmful to the environment or human health.

Recommendations:

No additional environmental investigations are recommended for APECS with a low potential for contamination.

6 ASSESSOR QUALIFICATIONS

6.1 WSP CANADA GROUP LIMITED

As one of the world's leading professional services firms, WSP provides technical expertise and strategic advice to clients in the Transportation & Infrastructure, Property & Buildings, Environment, Industry, Resources (including Mining and Oil & Gas) and Energy sectors, as well as offering project and program delivery and advisory services. Our experts include engineers, advisors, technicians, scientists, architects, planners, surveyors and environmental specialists, as well as other design, program and construction management professionals. With approximately 48,000 talented people in 550 offices across 40 countries—more than 8,000 in Canada and 9,500 in the U.S.—we are uniquely positioned to deliver successful and sustainable projects, wherever our clients need us.

6.2 QUALIFIED PERSON

Mr. Derek Stewart, M.Sc., P.Geo., QP_{ESA} is a Contaminant Specialist/Senior Project Manager with WSP and has more than 28 years' experience managing contaminant and groundwater investigations in support of transportation infrastructure and land redevelopment projects. Mr. Stewart's work includes project technical support for both regional planning and local scale impact assessment studies supporting transportation route planning for municipal, provincial and federal Environmental Assessments (EAs); transportation infrastructure preliminary and detail designs; land redevelopment; and property acquisitions/dispositions. In addition, Mr. Stewart provides groundwater and contaminant support for road, rail and transit infrastructure construction projects. Derek is a Qualified Person (QP_{ESA}) as defined under Ontario Regulation 153/04, as amended. Derek provided quality control this COS report.

6.3 TECHNICAL SUPPORT

Ms. Anne Pattison, B.Sc., G.I.T. is an Environmental Scientist with WSP, with over four years of experience in environmental and geotechnical science. She conducts Environmental Site Assessments and contaminant investigations including document research, site visits, interviews, report writing as well as implementing field investigations, including soil sampling through drilling and test pitting and groundwater monitoring and sampling. Additional responsibilities include carrying out hydrogeological assessments, and providing contaminant support for construction projects through planning of soil and groundwater investigations, and ongoing construction advising on excess materials management. Ms. Pattison conducted the records review, site reconnaissance and reporting for this COS report.

7 STANDARD LIMITATIONS

(“WSP”) prepared this report solely for the use of the intended recipient, Regional Municipality of Waterloo, in accordance with the professional services agreement between the parties. In the event a contract has not been executed, the parties agree that the WSP General Terms for Consultant shall govern their business relationship which was provided to you prior to the preparation of this report.

The report is intended to be used in its entirety. No excerpts may be taken to be representative of the findings in the assessment.

The conclusions presented in this report are based on work performed by trained, professional and technical staff, in accordance with their reasonable interpretation of current and accepted engineering and scientific practices at the time the work was performed.

The content and opinions contained in the present report are based on the observations and/or information available to WSP at the time of preparation, using investigation techniques and engineering analysis methods consistent with those ordinarily exercised by WSP and other engineering/scientific practitioners working under similar conditions, and subject to the same time, financial and physical constraints applicable to this project.

WSP disclaims any obligation to update this report if, after the date of this report, any conditions appear to differ significantly from those presented in this report; however, WSP reserves the right to amend or supplement this report based on additional information, documentation or evidence.

WSP makes no other representations whatsoever concerning the legal significance of its findings.

The intended recipient is solely responsible for the disclosure of any information contained in this report. If a third party makes use of, relies on, or makes decisions in accordance with this report, said third party is solely responsible for such use, reliance or decisions. WSP does not accept responsibility for damages, if any, suffered by any third party as a result of decisions made or actions taken by said third party based on this report.

WSP has provided services to the intended recipient in accordance with the professional services agreement between the parties and in a manner consistent with that degree of care, skill and diligence normally provided by members of the same profession performing the same or comparable services in respect of projects of a similar nature in similar circumstances. It is understood and agreed by WSP and the recipient of this report that WSP provides no warranty, express or implied, of any kind. Without limiting the generality of the foregoing, it is agreed and understood by WSP and the recipient of this report that WSP makes no representation or warranty whatsoever as to the sufficiency of its scope of work for the purpose sought by the recipient of this report.

In preparing this report, WSP has relied in good faith on information provided by others, as noted in the report. WSP has reasonably assumed that the information provided is correct and WSP is not responsible for the accuracy or completeness of such information.

Benchmark and elevations used in this report are primarily to establish relative elevation differences between the specific testing and/or sampling locations and should not be used for other purposes, such as grading, excavating, construction, planning, development, etc.

Design recommendations given in this report are applicable only to the project and areas as described in the text and then only if constructed in accordance with the details stated in this report. The comments made in this report on potential construction issues and possible methods are intended only for the guidance of the designer. The number of testing and/or sampling locations may not be sufficient to determine all the factors that may affect construction

methods and costs. We accept no responsibility for any decisions made or actions taken as a result of this report unless we are specifically advised of and participate in such action, in which case our responsibility will be as agreed to at that time.

The original of this digital file will be kept by WSP for a period of not less than 10 years. As the digital file transmitted to the intended recipient is no longer under the control of WSP, its integrity cannot be assured. As such, WSP does not guarantee any modifications made to this digital file subsequent to its transmission to the intended recipient.

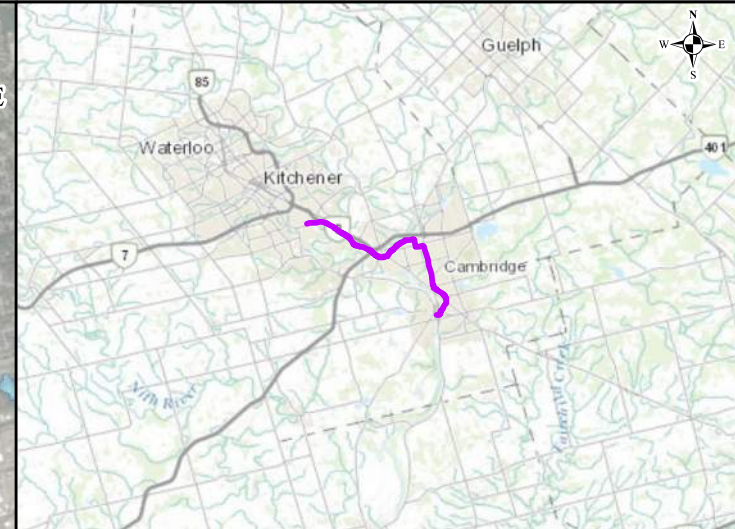

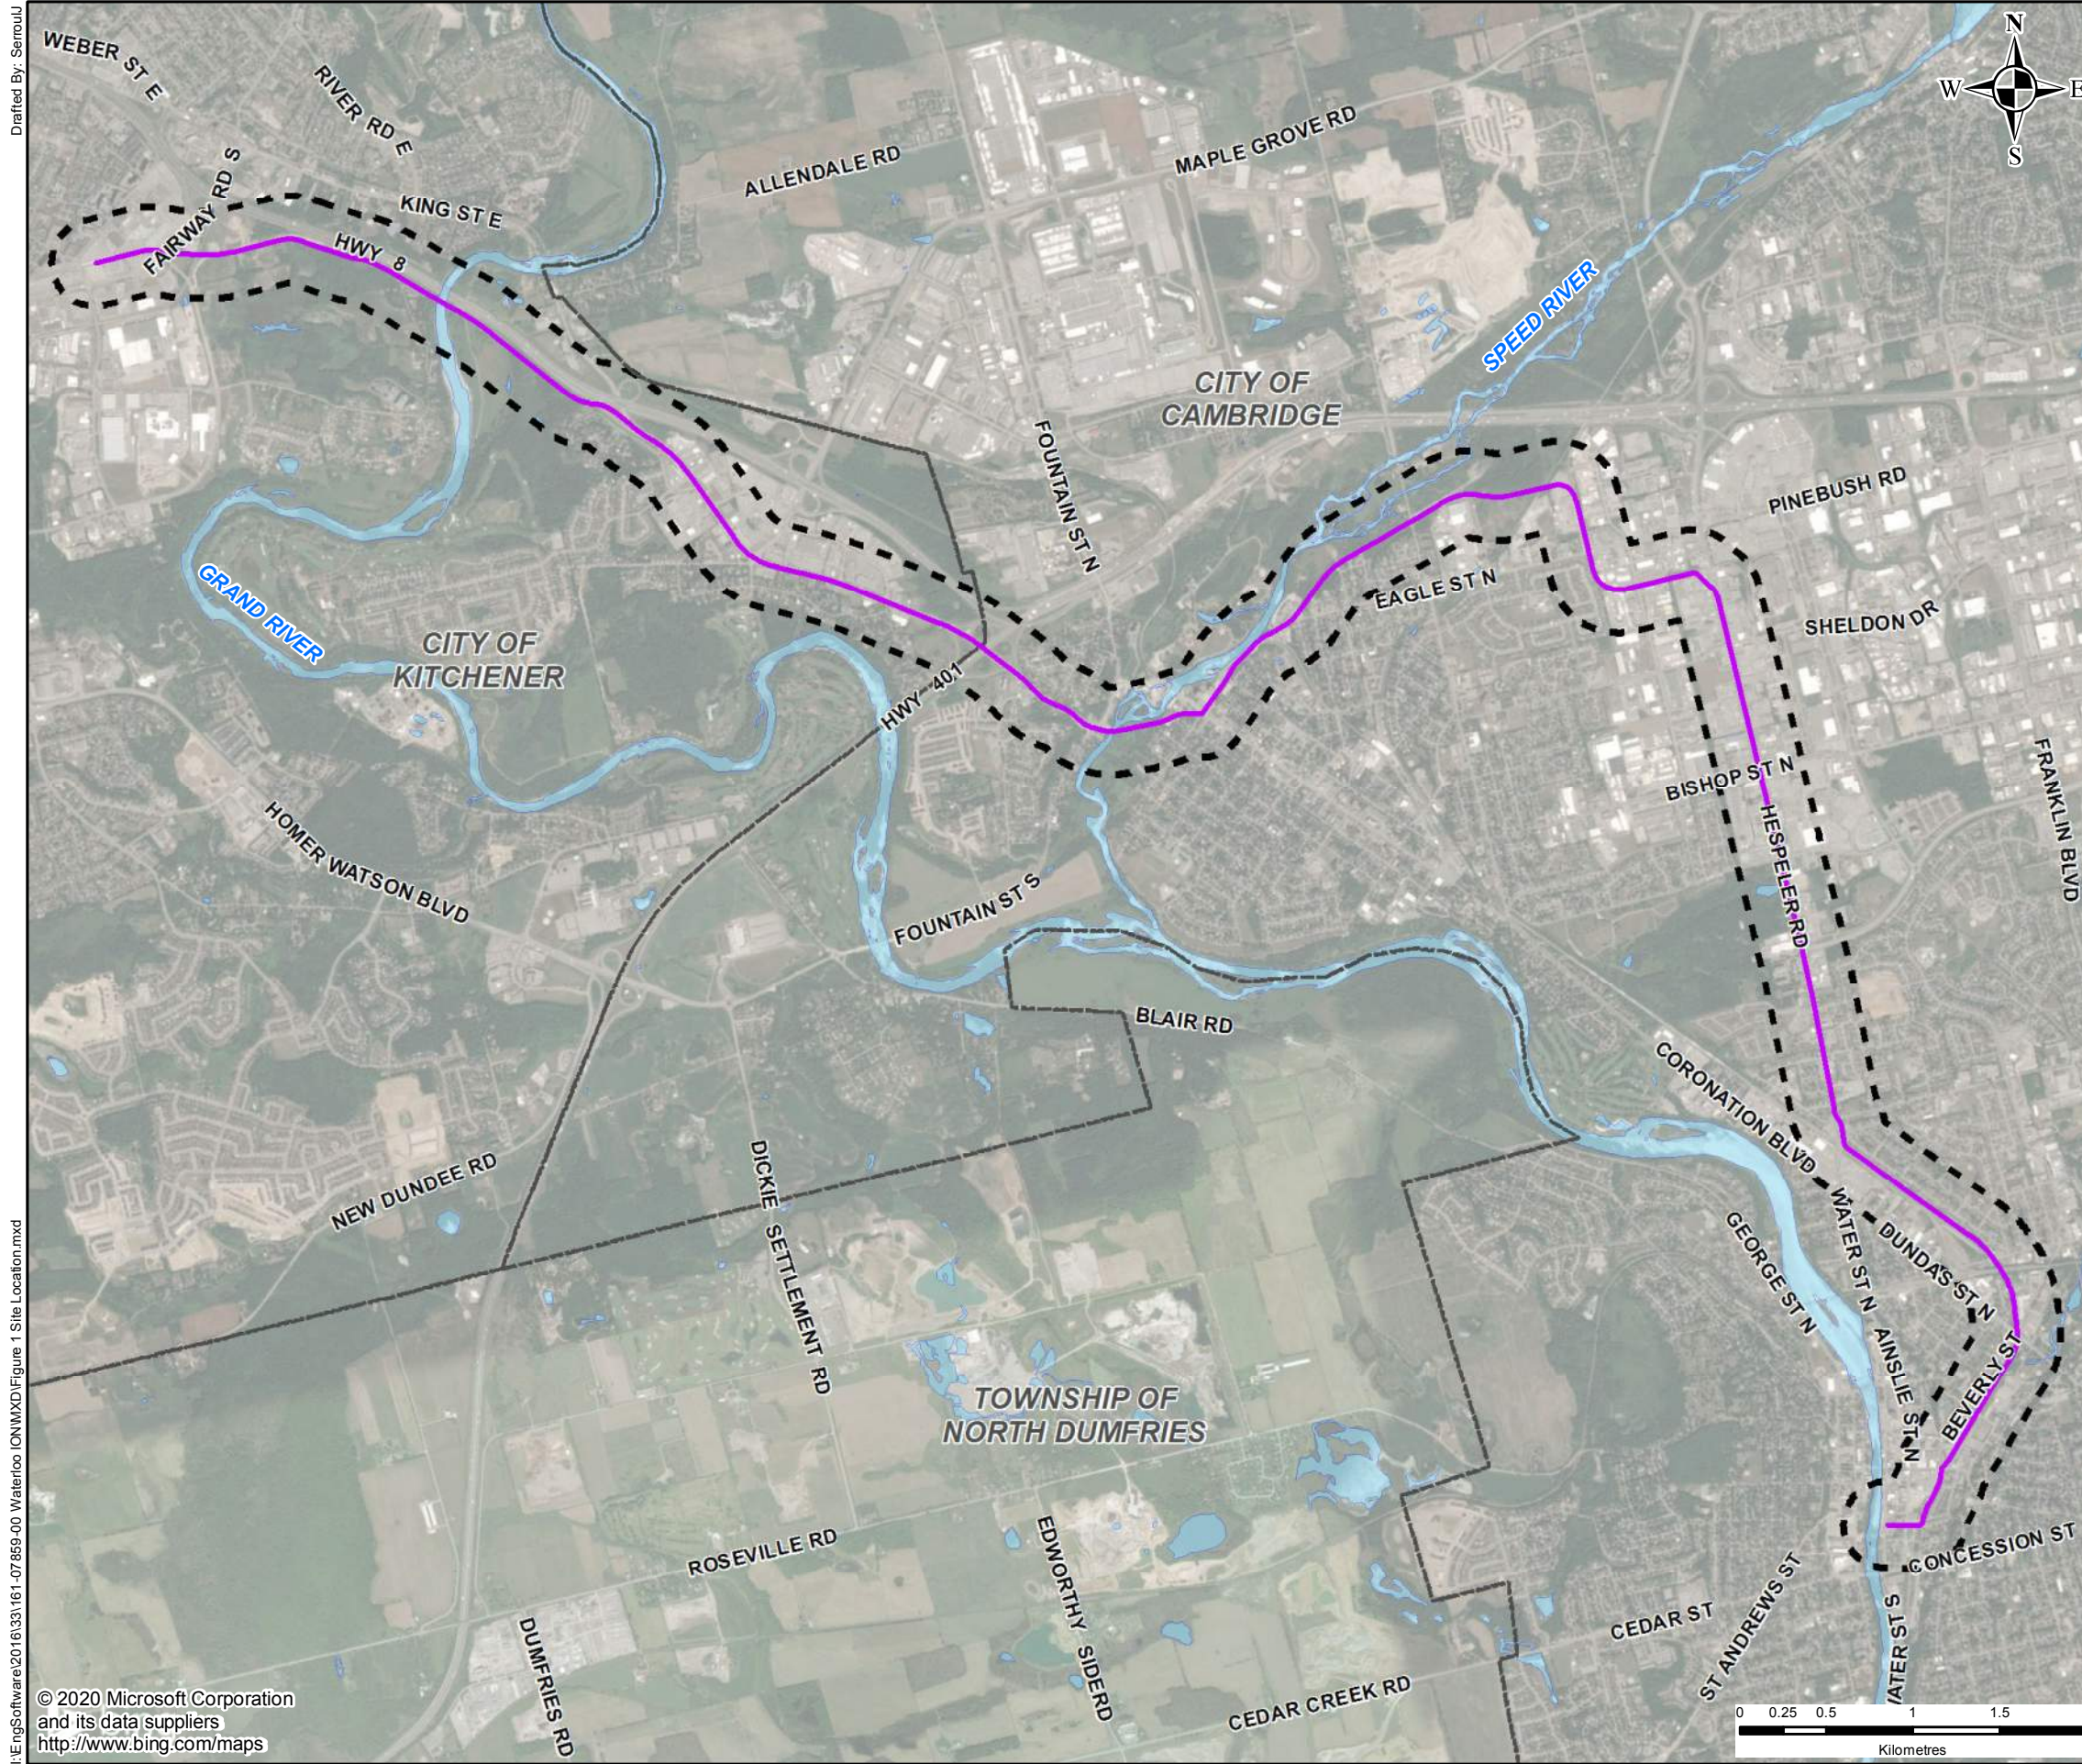

This limitations statement is considered an integral part of this report.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Investigation 1:					
Investigation 2:					
Penalty Imposed:					
Description:					A property owner has been fined \$700, plus a victim fine surcharge (VFS), after being convicted of failing to comply with an order from the Ministry of the Environment. The Court was told that James Wakeford purchased the property located at 62 Ainslie Street South in Cambridge, Ontario, in 1998 on an 'as is' basis. Previously, this address housed a dry cleaning operation. The Court heard that in 2001 excavation at the property revealed five underground storage tanks that were rusted, in poor condition and were leaking into the surrounding soil. The tanks contained various petroleum hydrocarbons (PHC) and perchlorethylene (PCE). In 2003, as the registered owner of the property, Wakeford was issued a Provincial Officer's Order by MOE that required him to retain a consultant to delineate the extent of contamination on and off the site. Wakeford did not comply with the order and was charged following an investigation by MOE's Investigations and Enforcement Branch. He pleaded not guilty to two counts of failing to comply with a condition of a Provincial Officer's Order, contrary to Section 186 (2) under the

111	1 of 1	NE/56.6	276.9 / -1.00	Russ St Dump 1966 Cambridge ON N3H	ANDR
Legal Description:		Waterloo			
Location Description:		S of Grand R, N of railway, at the end of Russ St, adj old George Pattison & Co woollen mill			
Municipality:		Preston Town			
Current Municipality:		Cambridge City			
RM:		Waterloo Region			
Facility:		Dump			
Date Active:		1960-70			
Date Begun:					
Date Complete:					
Area (Ha):					
Landfill Type:		sanitary landfill			
Group Name:		Grand River			
Operated By:		Preston T			
Serial:		MOEE 8076 1966			
NTS:		40P08			
Diameter (m):		150			
Historical Summary:					
Russ St Dump 1966 1972 NTS Map 40P08 Dump marked, 150m dia., S of Grand R, N of railway [1972 NTS 1:50,000 map Galt ON Sheet 40P08 Edition 5 (air photos 1966 culture check 1969, printed 1972)]. 1984 NTS Map 40P08 Not marked [1984 NTS 1:50,000 map Cambridge ON Sheet 40P08 Edition 7 (Air photos 1980, verification 1981, publication 1984)]. Russ St proposed dump "The opening of a new dump on the George Pattinson and Company property at the end of Russ Street is another winter works project" contemplated by Galt's Mayor for 1960 [Galt Reporter Jan 5 1960]. Russ St Dump MAY EXTEND PRESENT DUMP TO WOOLLEN MILL PROPERTY Preston Town Council is negotiating with Jamaica Holding Co., the owners of the old Pattison Woollen Mill to extend the present dump area. The Town's present site is at the end of Russ St, and it will be filled in 2 months. An extension to the mill would add years to the dump's lifespan. Alternate dump sites are being examined at the following locations (i) the land between the Speed River & Highway 401 at Speedsville, on the north boundary of Riverside Park, obtained from the town by the Department of Highways (Galt Evening Reporter August 3 1966). Russ St Dump 3 NEW TRASH SITES EASE PRESTON PILE: Three proposed dump sites have been approved in Preston, and may ameliorate the town's pressing garbage disposal difficulties. These are intended for decomposable wastes. They are located on Guelph St; Concession Rd and the CPR property off Main St. At present the town's Russ St Dump will be full by the end of the summer. DE&R has approved the sites and is encouraging Galt and Preston to co-operate on a joint site. Hespeler might come in on the scheme too since its dump was declared unsatisfactory by DE&R. Galt's dump is rapidly filling (Kitchener-Waterloo Record May 14 1970).

165	1 of 1	NE/91.8	276.3 / -1.57	Russ St Dump (official) Cambridge ON N3H 4B	ANDR
Legal Description:		Waterloo			
Location Description:		on N end of Russ St; SE of Speed River, E of line of Shettleston, W of line of Hexham, a vacant field in 1979, 60m to Grand River, 40m to residences			
Municipality:		Cambridge City			
Current Municipality:		Cambridge City			
RM:		Waterloo Region			
Facility:		Dump			
Date Active:		-1965-68			
Date Begun:					
Date Complete:		1968			
Area (Ha):					
Landfill Type:		open dump			
Group Name:		Grand River [Speed River]			
Operated By:		Preston T			
Serial:		MOEE 8076			
NTS:		40P08			
Diameter (m):					
Historical Summary:					
Russ St Dump (official) MOE 1979 Russ St cited as a closed waste disposal site. Described as a vacant field in 1979, 60m to Grand River, 40m to residences, closed 1968. MOE files extant in 1979 (MOE 1979 Site Identification Study). MOEE 1994 Russ St cited as a closed waste disposal site (Ontario Ministry of the Environment [1994] Waste disposal site inventory, [Toronto]: Ontario Environment, 1994., i, 196 pp., maps, ISBN 0772984093 101). In 1965 the OWRC investigated the dump at Preston. The site was a "partial" landfill, located on the north end of Russ St. Clean fill was used to cover the top of the dump and the OWRC found no open face. The OWRC reported no impact on the adjacent Speed River, and no pollution impact on surface waters. The site was in the southeast side of the Speed, north of the CNR ROW, at the north end of Russ St, east of the line of Shettleston and west of the line of Hexham (OWRC (1966) Water Resources Survey of the County of Waterloo [Ontario Water Resources Commission, 1966] pp. 146, 151, 158).

The air inside the silos will be displaced and vented out the top of the silos along with some particulate material during filling. The facility is also applying for the installation of two new general roof exhaust fans. These exhausts will vent air from the compounding area of the facility. Particulate that is present in the air of the general production areas of the plant where the raw materials are blended and compounded may be vented to the outdoor environment via the general roof exhaust fans.

Operating Period:		1870s-1890s (about 20 years)			
Surface Water:		Speed River			
Surface Water Prox:		Adjacent			
Surface Water Use:		Recreational			
Groundwater Prox:		Unknown			
Groundwater Use:		Municipal water supply			
Existing Wells Prox:		Supply wells on opposite side of Speed River approximately 300 m north of site			
Historical Map/Photo:		1884 fire insurance plan (Public Archives Canada NMC 9641); 1945 air photo (NAPL A9196-15)			
Operators:		Geo. Pattinson & Co (1870s-1890s)			
Present Occupants:		Aclo Compounds Inc			
Excavation History:		Gas house building demolished and excavated in late 1890s to construct existing building no. 12 (Aclo office space); some excavation associated with plant expansion (1950s)			
Visible Wastes:		None reported or observed			
Odour:		None reported or observed (some compound odour associated with Aclo operation)			
Water Pollution:		None reported or observed			
Site Investigations:		None known			
Comments/Remarks:		Small oil gasification plant that operated in association with the woollen mill; off-site disposal areas unknown, likely on-site disposal			
Site Description:		A woollen mill operated by Geo. Pattinson and Co. used a gasification plant to provide gas for lighting during the period 1870s to the 1890s. The gas plant was a small facility at the edge of the mill property and occupied only about 0.1 hectares. The gas plant is reported to be oil gasification but it may have included coal as well. The mill and gas plant were located at what is now 498 Eagle St. N. adjacent to the Speed River. The gas works were demolished in the 1890s for construction of what is today an office building. The property today is used for industrial purposes for the manufacture of thermoplastic molding compounds. Several original buildings from the 1890s remain on-site and have been incorporated into new buildings and additions. The land surrounding the property has industrial/commercial land uses or is vacant. The Speed River is adjacent to the site to the north.			
Potential Environ Impact:		The Pattinson Woollen Mill was a large woollen mill but the gas works was relatively small. There have been no reported problems with wastes on-site, and no visible wastes, odours or water pollution were observed. Given the lack of evidence of waste and the small operation it is unlikely that the gas plant has resulted in a significant impact on the environment. If an impact were to occur the Speed River which is adjacent to the site would be the most likely receptor. Municipal water wells are located on the north (opposite) side of the river at a distance of about 300 m but it is unlikely that these wells would be impacted by wastes from the gas plant.			
Offsite Disposal Areas:

Fuel Category:	Natural Gas			Attribute Category:	FS-Perform P-line Inc Invest
Date of Occurrence:				Regualtor Location:	
Occurrence Start Date:	2013/09/24				
Operation Type:					
Pipeline Type:					
Regulator Type:					
Summary:	930 EAGLE STREET, CAMBRIDGE - PIPELINE HIT - 1/2"				
Reported By:	ken Sleeper - Union Gas				
Affiliation:					
Occurrence Desc:					
Damage Reason:	Excavation practices not sufficient

Kitchener Car Dealership Owner fined \$8,000 for Discharge to Storm Sewer
Ontario Water Resources (OWRA)

Description:

On November 7, 2016, Paul P. Leung was convicted of one offence, was fined \$8,000 plus a victim fine surcharge of \$2,000 and was given 90 days to pay the fine.
Paul P. Leung pleaded guilty to one offence and was fined \$8,000 for discharging a floor cleaner/degreaser into a storm sewer which discharges to Freeport Creek and eventually the Grand River, contrary to the Ontario Water Resources (OWRA).

Background:

On September 7, 2015, the ministry received a call reporting that a liquid was being pumped into a storm sewer at a car dealership located on King Street East in Kitchener (the site)

The Waterloo Regional Police, Waterloo Region and the City of Kitchener works department responded to the report.

The individual responsible for the pumping was identified at the time as being Paul P. Leung.

By the time the Works staff arrived at the site, Mr. Leung had stopped pumping the material and most of the material had dissipated.

The Works staff inspected the site and creek to ensure there was no remaining material to clean up.

The materials pumped into the storm sewer were later confirmed to be a floor cleaner/degreaser.

The matter was referred to the Ministry's Investigations and Enforcement Branch and following an investigation charges were laid

Year: 1995
Discharge Type: Wastewater
Sector: Metal Fabrication Plant
District Area:
Type of Concern: Control Order/Certificate of Approval
Contaminant: see "Status Report"
Status Report: Exceeded the Certificate of Approval limit for total suspended solids once. Generated by bacterial growth which was caused by a drawing compound. The drawing compound was replaced by a synthetic one.

Site: American Standard, Div. of Wabco Standard Inc.
Cambridge ON

Database:
[NCPL](#)

Year: 1994
Discharge Type: Wastewater
Sector: Metal Fabrication Plant
District Area:
Type of Concern: Control Order/Certificate of Approval
Contaminant: see "Status Report"
Status Report: Exceeded average monthly concentration limit eight times and average monthly loading limit twice for total suspended solids. Shock chlorination was not successful in controlling the bulking of solids. The company has hired a consultant to study the problem and recommend a solution for implementation.

Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2018

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Nov 2016

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Jul 31, 2013

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2014

Certificates of Approval:

Provincial [CA](#)

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Commercial Fuel Oil Tanks:

Provincial

CFOT

List of commercial underground fuel oil tanks made available by the Fuels Safety Program of the Technical Standards & Safety Authority (TSSA). Ontario Regulation 213/01 of the Technical Standards and Safety Act (2000) requires that all underground tanks be registered with the TSSA. Note: the Fuels Safety Division does not register waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of commercial fuel tanks in the province. The TSSA updates information in its system on an ongoing basis; this listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: Feb 28, 2017

Chemical Register:

Private

CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jul 31, 2018

Compressed Natural Gas Stations:

Private

CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 - Dec 2018

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial

COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial

CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Nov 2018

Certificates of Property Use:

Provincial

CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Nov 30, 2018

Drill Hole Database:

Provincial

DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Oct 2018

Dry Cleaning Facilities:

Federal

DRYCLEANERS

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2016

Environmental Activity and Sector Registry:

Provincial

EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

Government Publication Date: Oct 2011-Dec 31, 2018

Environmental Registry:

Provincial

EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Nov 30, 2018

Environmental Compliance Approval:

Provincial

ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Dec 31, 2018

Environmental Effects Monitoring:

Federal

EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private

EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Oct 31, 2018

Environmental Issues Inventory System:

Federal

EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

List of TSSA Expired Facilities:

Provincial

EXP

List of facilities and tanks - for which there was once a registration - no longer registered with the Fuels Safety Program of the Technical Standards and Safety Authority (TSSA). Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc. Tanks which have been removed from the ground are included in the expired facilities inventory held by the TSSA. Notes: the Fuels Safety Division did not register private fuel underground/aboveground storage tanks prior to January of 1990, or furnace oil tanks prior to May 1, 2002; nor does the Division register waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

Government Publication Date: Feb 28, 2017

Federal Convictions:

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

Government Publication Date: Jun 2000-Oct 2018

Fisheries & Oceans Fuel Tanks:

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2017

Fuel Storage Tank:

Provincial

FST

List of registered private and retail fuel storage tanks made available by the Fuels Safety Program of the Technical Standards & Safety Authority (TSSA). Ontario Regulation 213/01 of the Technical Standards and Safety Act (2000) requires that all underground tanks be registered with the TSSA. Notes: the Fuels Safety Division did not register private fuel underground/aboveground storage tanks prior to January of 1990, or furnace oil tanks prior to May 1, 2002; nor does the Division register waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of fuel storage tanks/tank facilities in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

Government Publication Date: Feb 28, 2017

Fuel Storage Tank - Historic:

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Dec 31, 2018

Greenhouse Gas Emissions from Large Facilities:

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2016

TSSA Historic Incidents:

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

TSSA Incidents:

Provincial

INC

List of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC) and made available by the Technical Standards and Safety Authority (TSSA). Under the Technical Standards & Safety Act (2000), the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors, and equipment or appliances that use fuels. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

Government Publication Date: Feb 28, 2017

Landfill Inventory Management Ontario:

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Sep 30, 2017

Canadian Mine Locations:

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Environmental Penalty Annual Report:

Provincial

MISA PENALTY

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2017

Mineral Occurrences:

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Jan 2018

National Analysis of Trends in Emergencies System (NATES):

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2016

National Defense & Canadian Forces Fuel Tanks:

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2018

National Energy Board Wells:

Federal

NEBW

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets 'or Trends' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGW

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Nov 30, 2018

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSRL Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-May 2018

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Nov 30, 2018

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: 1988-Mar 2018

TSSA Pipeline Incidents:

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills) made available by the Technical Standards and Safety Authority (TSSA). Under the Technical Standards & Safety Act (2000), the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors, and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of pipeline incidents in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

Government Publication Date: Feb 28, 2017

Private and Retail Fuel Storage Tanks:

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial

PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Nov 30, 2018

Ontario Regulation 347 Waste Receivers Summary:

Provincial

REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016

Record of Site Condition:

Provincial

RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Sep 2018

Retail Fuel Storage Tanks:

Private

RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Jul 31, 2018

Scott's Manufacturing Directory:

Private

SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial

SPL

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Sep 2018

Wastewater Discharger Registration Database:

Provincial

SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2016

Anderson's Storage Tanks:

Private

TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal

TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Aug 2017

TSSA Variances for Abandonment of Underground Storage Tanks:

Provincial

VAR

List of variances granted for abandoned tanks. Under the Technical Standards and Safety Authority (TSSA) Liquid Fuels Handling Code and Fuel Oil Code, all underground storage tanks must be removed within two years of disuse. If removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of tank variances in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

Government Publication Date: Feb 28, 2017

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Dec 31, 2018

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Dec 31, 2017

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
