**Re: Contract T2024-133 Fountain Street & Maple Grove Road Roundabout, City of Cambridge**

Region of Waterloo CAO has approved award of Contract T2024-133 Fountain Street & Maple Grove Road Roundabout to Regional Sewer and Watermain of Cambridge. **Construction is expected to commence on or about May 6, 2024.** Please refer to the Staging plan available on the website which outlines the scope of work and staging of construction.

### **Working Hours**

Normal working hours are Monday to Friday from 7:00 a.m. to 7:00 pm. Occasional Saturday work and weekend work may occur from time to time.

### **Traffic Restrictions during Construction**

Traffic will be restricted to a single lane in each direction on both Fountain Street and Maple Grove Road during for every stage of construction within the project limits. Also, an additional left turn lane will be available on each leg of the intersection for every stage of construction. Please refer to the Staging Plan available on the website for additional details.

### **Traffic Detours**

Traffic detours will not be implemented until full closure for surface asphalt paving in 2025.

### **Access to Businesses and Residences**

Access to businesses and residences within the construction limits will be maintained to the greatest extent possible; however, disruptions will occur when construction activities are being completed directly adjacent to an entrance. The Contractor will provide as much notice as possible to businesses and residences when construction activities are occurring adjacent to a property. If construction activities will make it such that you are unable to access your driveway for a short duration (including overnight), you will be directed to an alternate access.

There may be periods of time when traffic will need to travel on a gravel surface, as well as times when traffic will need to be controlled with flag persons. Temporary signage indicating businesses are "Open and Accessible" will be provided for all businesses within the active stage of construction.

Please plan for some delays and travel carefully through the construction zone. We request that when driving or walking through and around the construction zone you follow and obey the construction traffic signage for your safety and for the safety of the workers.

### **Grand River Transit Service Changes**

Grand River Transit vehicles may need to be rerouted. Please refer to the GRT website for the most current information on transit routes.

<https://www.grt.ca/en/schedules-maps/detours.aspx>

### **Garbage and Recycling (for properties within the active construction limits only)**

During construction, for those properties that receive curb-side collection, we urge that you place your garbage in disposable bags (please avoid use of containers) at the curb along with your blue box, green bin and yard waste prior to 6:00 A.M. on your normal collection day. The garbage and recycling materials will be taken by our contractor to adjacent side streets for pickup by Waste Management. Blue boxes and green bins will be returned by day's end. Please clearly mark your address number on your blue box and green bin to ensure proper return. Please refer to the Region of Waterloo's website regarding recent changes to collection of garbage and recycling at:

[www.regionofwaterloo.ca/en/aboutTheEnvironment/waste-management.asp](http://www.regionofwaterloo.ca/en/aboutTheEnvironment/waste-management.asp)

### **Canada Post Mail Delivery (for properties within the active construction limits only)**

Properties that receive door service mail delivery should not be affected while construction is taking place. If you do experience a disruption in your mail delivery please contact Canada Post at 1-866-607-6301 or go to their website [www.canadapost.ca](http://www.canadapost.ca) or [contact the Region's on-site representative.](#)

### **Restoration and Landscaping**

The work on this project includes the reinstatement of driveways, sidewalks and any landscaping that is affected by the work. Only the affected portion of a driveway will be replaced/reinstated.

The Contractor will take care of any sod we replace for 60 days. After 60 days, all sod maintenance and watering becomes your responsibility, as it was prior to construction.

### **Vibration, Dust, Mud**

You may feel slight vibrations from the construction work. All efforts will be made to minimize adverse impacts from the construction including dust, mud and vibration.

### **Management of Contaminated Material**

As part of the construction contract, the Contractor will be removing known contaminated soil within the project limits. Proper measures will be in place by the contractor to safely remove,

store and truck away the contaminated soil. Staff on site will have appropriate personal protective equipment when in proximity to contaminants. The nature of the contamination is mainly associated with petroleum fuel and salt residual.

The contractor and consultant will be continually monitoring air quality and utilizing dust control methods, however, residents should expect occasional odours.

### Contact Information During Construction

For any questions or concerns during construction, please contact:

Contact Person	Nature of Question / Concern	Name	Contact Number
Regional Sewer and Watermain	Road safety, general access, construction related issues daytime or after hours	Frankie Escobar	(519) 212-7074 <a href="mailto:frankie@regionalsewer.com">frankie@regionalsewer.com</a>

## Updates During Construction

Information about this project, including periodic updates will be available through the Region's website at:

<https://www.regionofwaterloo.ca/en/living-here/construction-and-road-closures.aspx?mid=25142>

Every reasonable effort will be made during construction to minimize disruption and complete the work efficiently and cost effectively. We thank you in advance for your patience and cooperation.

Yours truly,

Jeff Nyenhuis
