1.0 Maps

According to Section 7.6 of the *Standards and Guidelines for Consultant Archaeologists* (S & G) administered by the Ministry of Citizenship and Multiculturalism (MCM 2011), any information that pinpoints the location of an archaeological site (e.g., detailed assessment results mapping, tables of Global Positioning System (GPS) coordinates for site locations) must not be included in the project report and should only be provided in the Supplementary Documentation. This allows the MCM to exclude it from the Ontario Public Register of Archaeological Reports, if necessary. Archaeological site location information is considered by the MCM to be confidential and/or sensitive information that cannot be made public.

The following maps show the approximate location of sites within one kilometre of the Study Area, including those within the Study Area, available from the Ontario Archaeological Sites Database (OASD): AiHc-111, AiHc-426, and AiHc-430, AiHc-557, and AiHc-558. These sites do not require further work. Findspot and site descriptions, and other relevant information relating to all archaeological work conducted for the project are contained in our accompanying Stage 2 assessment report submitted to the MHSTCI (ASI 2023).
