**Re: Upcoming lane restrictions  
Avalon Place between Stirling Avenue and Southmoor Drive**

The construction of the Highway 7/8 pedestrian and cycling bridge is moving along with our contractor, Eiffage, preparing for the work to start over the next few weeks.

I'm sure you've heard about supply chain shortages across the country, and we've run into issues on other projects. To mitigate the risk of not having the materials we need for this project, our contractor has already secured the delivery of equipment and materials required in advance of needing them.

This also allows Eiffage to proceed with multiple construction operations at the same time to minimize how long the project will take. This is great news, but it also means we need to extend the work area onto a portion of Avalon Place.

The additional work zone will be the south lane of Avalon Place between Stirling Avenue and Southmoor Drive, and therefore, Avalon Place will be restricted to a single lane, westbound direction only. On street parking will be prohibited along this area of Avalon Place for the duration of the work to ensure minimum land width.

We anticipate this lane closure to be required until about September of this year. We've included a diagram for your reference. We expect construction to be completed by the end of fall of this year.

We appreciate your patience and understanding as we complete these infrastructure works. Please contact me if you have any questions or concerns.

Regards,
